

May 5, 1929

Why Every Registered Voter Should Cast a Ballot at Tomorrow's City Primary Election

Probably most of those who will cast a ballot in tomorrow's primary election have decided whom they will vote for in the various municipal contests. There is very little excuse for misapprehension upon the part of any voter as to the basic issues in the race for Mayor, City Attorney, City Council, the Board of Public Works, and the various contests for judgeships of the Superior Court. Campaign arguments have been

clearly and energetically set forth by the several candidates. The willingness of men and women of integrity, courage and ability to seek public office places a certain obligation upon the electorate. It is an obligation that should not be shirked—and it can be discharged only at the ballot box. Bad government, poor service, dishonesty, laziness,

indifference and foolhardiness in public service; oppressive taxes, inequitable assessments, wastefulness, fraud—all can be remedied by ballots. Majorities seldom go wrong when they express their collective will in an election, but majorities that stay at home on election day, or disintegrate into opposing groups, relinquish government to the representatives of the minority.

The Times in this election has urged support for certain candidates, particularly stressing the desirability of electing John R. Quinn as the city's next Mayor. However, on this election eve, regardless of the views of any voter or group of voters—whether for Quinn, Green, Bonelli, Porter, Workman or any other—The Times recommends that each elector find time during the day tomorrow to go to the polls and VOTE!

MERGER REPORTED

Continental Lines Join

Consolidation of Yellowcab, Pinkney and Greyhound Interests Disclosed

Individuals Named Backers of Project Declared to Involve \$18,000,000

CHICAGO, May 5. (AP)—The Omaha News today said that an \$18,000,000 merger of motor bus transportation lines was consummated last Thursday.

The merger, said the newspaper, brought under a single management the three largest transportation lines in the United States, working in harmony with several of the most advanced systems of the world.

The merger, said the newspaper, was a consolidation of the Yellowcab, Pinkney and Greyhound lines, which are now being operated by the Omaha News.

JAIL AWAITS SINCLAIR

Oil Man's Term Begins Today

Contempt of Senate Will be Atoned by Three Months Spent in Workhouse

Employees Hardly Able to Realize "Big Boss" Must Don Garb of Felon

CHICAGO, May 5. (AP)—The New York Times today said that the thirty-two-story Sinclair Building in this city is a tower of sorrow.

Nearly everybody in that building, which is almost exclusively devoted to the executive activities of the Sinclair Oil Company, is aware of the fact that the "big boss" is in the building.

It is hard for the scores of executives in the Sinclair Building to realize that the "big boss" is in the building.

It is hard for the scores of executives in the Sinclair Building to realize that the "big boss" is in the building.

All the Court Fools Aren't Dead Yet!

I HAVE NO CONFIDENCE IN THE COURTS!
AM! THEN I TAKE IT YOU'VE PICKED OUT SOME GOOD MEN TO VOTE FOR AS JUDGES ON THE MUNICIPAL COURT TOMORROW!
ER—NO—ARE THERE SOME JUDGES ON THE BALLOT?

YES, THERE ARE SOME JUDGES ON THE BALLOT! HOW DO YOU EXPECT TO HAVE ANY CONFIDENCE IN THE COURTS IF YOU DON'T TAKE ENOUGH INTEREST IN THEM TO SEE WHO SITS ON THE BENCH?

YOU HAVE NO CONFIDENCE IN THE COURTS? HUH!

PRESIDENT SAYS BIBLE BEST PILOT

Preservation of Nation's Ideals Lies in Keeping its Principles, He Avers

BALTIMORE, May 5. (AP)—President Hoover today told the closing session of the National Federation of Men's Bible Classes in convention here.

The text of President Hoover's message follows: "There is no other book so valuable as the Bible, nor one so full of concentrated wisdom. Whether it be of the law, business, morals, or that vision which leads the imagination in the creation of constructive enterprises for the happiness of mankind, he who seeks for guidance in any of these things may look inside its covers and find illumination. The study of this book in your Bible classes is a post-graduate course in the richest library of human experience."

"As a nation we are indebted to the Book of Books for our national ideals and representative institutions. Their preservation rests in adhering to its principles."

POLAR SKIES COLOR RIOT

Unusual Aurora Seen by Byrd

Arches, Curtains, Streamers and Coronas of Light Play for Hours

Two Flying Fields at Little America Named After Bob and Fosdick

By Russell Owen

CHICAGO, May 5. (AP)—The most beautiful aurora we have yet seen took place last night. It began at about 7 p.m. and lasted with varying intensity until 10:30. Every form of aurora was seen—coronas, arches, curtains and streamers.

Soon after 7 o'clock there were four waving curtains of fire stretching from the west to the east. At first they were white, but spots of rose began to glow in them, blushing and dying down, and then a curtain almost directly overhead seemed to part and a mass of whirling fire was seen glowing with rosy colors. It was like a grating storm of fire, so marvelous that it drew exclamations of astonishment from those who remained outside in the cold to watch it.

MERCURY CLIMBS

There had been a strong aurora Friday night for the first time in many days as the moon has been either so bright as to dim the rays or clouds have obscured them. It began about 10 o'clock, low in the northwest, and soon turned into an arch and then into an undulating curtain which stretched almost to the zenith. It lasted for several minutes before fading.

As the moon is getting smaller and lower each night the aurora probably will be visible more often in the next month and there will be an opportunity to observe this beautiful and little understood phenomenon.

A short period of comparative warmth, which to us was almost unpleasant, during which the thermometer went to 5 above zero, has been followed by a sharp drop to zero last night. The average temperature for April was nearly 29 below zero, or nearly double the average for the month recorded by Amundsen.

One of those inexplicable changes in weather took place here last Wednesday, with the coming of a blizzard out of the east, the direction from which they usually come. The wind went up to nearly forty miles an hour and with it the temperature rose as it does almost invariably. When the blizzard started it was 42 below zero, but when the wind began to decrease it was 9 degrees above zero.

AIR FIELDS NAMED

This warmer weather had a corresponding effect upon the snow. After every blow the long drifts, which pile up to a height of every object, are generally hard and so closely packed that they ring hollow under foot and will support without any sinking the weight of the heaviest man. But Thursday morning after the warmer weather we found that the snow was soft and that we sank in it deeply. Everyone had been so used to stepping confidently to the hard surface of a drift that it was quite surprising to feel that it gave way under foot.

Commander Byrd has named the two large flying fields on the north and south sides of the barrier in honor of two of the best friends of the expedition.

"I have decided to name the landing fields of Little America after the two men who have done untold things for the expedition and without whom the expedition would have been impossible—Charles B. Bob and Raymond Fosdick," he said today. "These are probably the largest flying fields in the world. The north field will be the Charles B. Bob field and the south field the Raymond Fosdick field."

One hundred and eleven arrests were made today.

BUDAPEST (Hungary) May 5. (AP)—Police announced today they have unearthed a Communist plot against the government and arrested five suspects who possessed considerable revolutionary literature.

CHICAGO, May 5. (AP)—Plans for construction of the world's tallest building, a seventy-five-story edifice to house the general offices of the Illinois Central Railroad and the Crane Manufacturing Company, have been announced.

The building, to be known as the Crane Tower, will rise 1022 feet, thirty-eight feet higher than the top of the Eiffel Tower in Paris. It will be located on Chicago's new thoroughfare, Randolph Boulevard. The date for the start of construction has not yet been announced.

BUILDING TO DWARF ALL MAN'S WORK

Projected Chicago Tower Will Rise Thirty-eight Feet Above Eiffel

Will Rogers Remarks:

NEW YORK, May 5. (The Editor of The Times): Sunshine and perquisites are mighty scarce in Democrats' lives, but just last you forget this Owen D. Young that is doing such splendid work in Paris trying to divide one bone with half a dozen dogs and not even having the bone to divide, it's fallen to his lot to demonstrate to even the prize winners, that war pursues was greatly exaggerated, and to be on the losers' side is a downright discouragement. Well, this Young is a Democrat, strange as it may seem, and I have been his Mark Sullivan since 1926. I don't want to run him for President. I just want to keep him to "point with pride" while we are "viewing our others with alarm."

Yours, WILL ROGERS.

BLOW AIMED AT STATE

Farm-Aid Joker Stirs Protest

Amendment to Relief Bill in Congress Bars Vegetables and Fruits from Benefit

Legislature Prepares to Act to Obtain Square Deal for California Growers

SACRAMENTO, May 5. (Exclusive)—A resolution urging United States Senators Johnson and Shortridge to support the farm-relief bill in Congress in the form in which it passed the House will be introduced in the Legislature tomorrow, it was learned here today.

The resolution will carry the names of a large group of Assemblymen and Senators, representatives of various elements and political faiths, but all agreed on one point, that the agricultural industries of California must be protected. In particular the resolution will urge the defeat of the amendment of Senator Copeland of New York, withdrawing fruits and vegetables from the list of products to benefit under the terms of the bill.

Members of the Legislature were apprised today for the first time of the existence of the Copeland amendment to the farm-relief bill, which apparently was slipped in unnoticed several days ago while attention was centered on the battle over the debt-reduction clause.

The Copeland amendment, as viewed here, is a direct blow at California and legislators advised of the move are incensed. Co-operative organizations engaged in marketing the State's huge fruit and vegetable crops will be prevented from obtaining any benefit from the farm-relief bill if the amendment remains in the measure.

Every effort will be made, it is stated, to hurry through the adoption of the Legislature's resolution, so that its effect can be felt the sooner in Washington.

COPELAND'S AMENDMENT INSPIRED BY SPECULATORS

QUAKES KILL IN PERSIA

Tembler Victims Put at 2000

Twenty Villages Destroyed by Twelve Shocks and Thousands Homeless

Huge Clefts Left in Earth; Swarms of Locusts Add to Horrors

TEHRAN (Persia) May 5. (Exclusive)—Hundreds were killed and thousands were homeless without food as the result of a terrific earthquake in Khorasan Province, which was caused by twelve distinct shocks. The most conservative estimate of the dead is 2000. At the town of Bihrud, 400 stores and more than 400 residences were destroyed. It is impossible to estimate the number of bodies buried beneath the debris.

Twenty villages in the same district are entirely destroyed, and all human beings and cattle killed. Hundreds of deaths are reported from the town of Shirvan and all the live stock there is killed. Other near-by villages have suffered severely, but there are yet no detailed reports, though it is reported at one place the ground is broken to a width of three yards and that the cleft, so made extends for eighteen miles.

A second calamity hit the country with the arrival of a swarm of locusts.

There are millions of the insects covering all of Eastern Persia in such incredible numbers that the sky is darkened. In the Province of Khorasan, trees as well as smaller plants have been attacked, the platanus not trees, particularly.

CAUSES OF EARTHQUAKES TO BE SOUGHT IN CONGO

WASHINGTON, May 5. (AP)—The heart of Africa will be pierced by two scientists of the Carnegie Institute in completing a world survey to find the geological mechanism which causes earthquakes.

The physical features in the region below the equatorial line and east of the famous Congo region will be studied. The results will be linked with other studies in earthquakes regions throughout the world to seek a theory on the general causes of earth quakes.

Comparative studies have been made in California, scene of the destructive 1906 earthquake; in Chile, ravaged in 1922; and in Japan, the Philippines, New Zealand and Palestine.

Dr. Bailey Willis, Palo Alto, Cal., research associate and retired professor of Stanford University, has departed. He will be joined in the summer by Dr. N. L. Bowen of the geophysical laboratory.

Dr. Willis first will visit England and the European continent to confer with earthquake specialists on the African region. Dr. Bowen will leave in May to examine European collections of volcanic rocks of Africa.

The two will meet in Africa at the international geological congress in Pretoria, Transvaal, and after studying the structure of the southern part of the dark continent, will proceed to the northern interior.

Panama Airways in Flying Start

Pan-American Airways yesterday successfully inaugurated a thrice daily trans-isthmian passenger, mail and express service with France

Field the starting point and Albrook Field as the Pacific terminus. The plane is completely booked for several days in advance, officials said, the fare being \$10.

Ralph Section, president of Isthmian Airways, announced a competing service across the isthmus which starts next week with the same fare and with added service to interior cities.

TORNADO RIPS TOWN ROOFS

Damage of \$100,000 Caused in Berlin, N. H., When High Wind Strikes Main Street

BERLIN (N. H.) May 5. (AP)—A tornado, accompanied by a thunderstorm, struck the main street of this city late today and did property damage estimated at \$100,000. The roofs of buildings for a distance of a half mile were ripped.

Fire which broke out virtually destroyed a business block. No injuries to persons were reported, although residents observed the rapid approach of dark clouds and in a few seconds a high wind descended upon the city. The tornado, which lasted about three minutes, confined itself to the business district on Main street.

The roof of a two-story 100-foot garage was torn off and buried twenty-five feet. Two three-story brick blocks farther up the street were hit next. The roofs were ripped off and the interior of both structures badly damaged. A brick building containing the offices of the International Paper Company was badly damaged.

Witnesses said the tornado went from one side of the street to the other breaking plate-glass windows and tearing down all electric light poles in its path for a distance of a half-mile.

The roof of the City Hall suffered considerable damage as did that of the Albert Theater. The Steady Block, a two-story wooden building, burst into flames immediately after the tornado had passed. The building was destroyed. It was not determined whether the starting structure or whether the effects of the tornado caused a short circuit in the wiring. The city is without electric light tonight.

YOUNG HEIRS LINING UP
Governor Timber Capitol Topic
 Carnahan Likely Candidate
 If Johnson Machine Picks New Man
 Fitts Considered Strongest Possibility as Opponent in 1930 Race

BY C. A. JONES
 "Times" Staff Representative
 SACRAMENTO, May 5. (Exclusive)—The question of who will be the candidates for Governor and Lieutenant-Governor in the Republican primaries of August, 1930, has been agitating the Legislature all during this session, and now is the principal topic when two or more statesmen or politicians meet over a glass of soda water.

It has been taken for granted that Gov. Young will run for re-election as the candidate of the old Hiram Johnson machine, but it is entirely possible that Gov. Young will find his personal affairs so pressing that he cannot devote any more time to the public service. This legislative session has been extremely disappointing to him, and he has been particularly disappointed in the Senate Constitutional Amendment.

Eighteen, when Gov. Young sent for able politicians on the Assembly floor to win "no" votes and they cornered him, each emissary getting and holding one Assemblyman, with an extra one left over. That event is typical of many which have occurred this year.

If the Johnson machine decides to discard Young, who will be the heir? Without question of doubt, the most popular candidate would be Lieut.-Gov. Carnahan. He is the best-liked man at the capitol and his handling of the Hardy impeachment trial made him a reputation that will endure.

Next among Young heirs comes Will C. Wood, State Superintendent of Banking. Mr. Wood long has had ambitions to run for Governor, and if Young steps out he will try to step in.

"TIMES" ELECTION RETURNS
 In accordance with its custom, The Times will make known the results of the municipal primary election Tuesday night by radio, telephone and extra editions as rapidly as the figures become available.

Returns will be broadcast by The Times over KHL, the Don Lee station, beginning about 7:30 p.m. and continuing at intervals until the results are known. A battery of loud speakers outside the Times Building will carry the returns to street crowds. The returns will also be given by telephone to all who call.

Mr. Fitts has ample legislative experience, having served through the session of the Legislature as Lieutenant-Governor after he led the ticket, being the best vote getter in the State. He was practically unopposed for District Attorney last summer.

The Young administration literally is scared stiff by the menacing shadow of Fitts. Young, they feel, will be unable to put over anything, without having a candidate against him whom they fear will run like a prairie fire. They are feverishly praying that some whirl of the wheel will destroy his present popularity.

Senator Merriam of Long Beach is the favorite of the present administration. He is supposed to be the recipient of the mantle discarded by ex-Gov. Richardson, who, himself, will figure in the fight, if not as a candidate, as an active participant. Senator Merriam was for two terms speaker of the Assembly.

There has been considerable discussion of Senator Edwards of Orange as a candidate. Senator Edwards was highway commissioner under ex-Gov. Richardson. He is universally admired, and naturally is pleased at the compliment paid him by those who respect his character and ability.

CHINESE PLEA MADE PUBLIC
 Note Requests Removal of Extraterritorial Rights
 Orientals Argue That "New Era" Has Arrived
 Western Law Conceptions Prevail There Now

WASHINGTON, May 5. (AP)—The text of a note from the Chinese Nationalist government looking toward abolition of American extraterritorial rights in China, which was presented to Secretary Stimson last week, was made public today by Dr. C. C. Wu, the Chinese Minister.

The note pointed out that requests for removal of these foreign rights have been made at the Paris peace conference and later at the Washington arms conference. The latter conference, it said, "placed on record its sympathetic disposition toward abolishing the extraterritorial rights of China for the removal of restrictions on her political, jurisdictional and administrative freedom of action."

It added that the unification of China and the placing of the national government upon a firm basis has brought about "a new era" in the relations between the United States and the country through the conclusion of the recent tariff treaty.

"But," it continued, "it is the belief and the conviction of the Chinese government that the promotion of such material well being will be accelerated by a readjustment of the relations between our two countries on a basis of friendly equality in matters of jurisdiction, and if the American government could see its way to meet the wishes of the Chinese government and people in this regard, it is certain that another obstacle to the full and frank cooperation in trade and other matters between the Chinese people and foreign nations in this country would be happily removed."

Extraterritoriality, the note contended, has ceased to be adaptable to present conditions. It added that the close contact between China and the foreign powers has brought a rapid assimilation by Chinese of the western conceptions of law and they have been incorporated rapidly in Chinese jurisprudence.

SUN GAMBLER WITH SCIENCE
 Astronomers in Philippines Hoping to See Eclipse
 Tons of Equipment Carted From Long Distances
 Only Fifty-Fifty Chance Sky Will Not be Obscured

MANILA, May 5. (AP)—The greatest group of astronomers ever to come to the Philippines are in the central islands of the archipelago to observe the total eclipse of the sun on the 9th inst. Two groups of scientists from the United States, one from Germany and one from the Manila observatory, have established stations from which to view the phenomenon.

The groups from abroad came half-way around the world, bringing with them tons of instruments at a cost of thousands of dollars, on a chance that the sky will be clear when the eclipse occurs.

They are informed by the local Weather Bureau that the eclipse will take place at the beginning of the rainy season and that there is only half the chance that clear weather will prevail. But of so great importance do they consider this chance to study the sun's corona, which may be seen during a total eclipse, that they choose to gamble with the weather.

The party is headed by Commander C. H. J. Kessler, U.S.N. Other members of the expedition are: Prof. W. A. Cogshall, head of the department of astronomy, University of Indiana; Mrs. Cogshall, Prof. Paul A. Sollenberger, astronomer at the Naval Observatory, and Lieut. Albert J. Kellers, Medical Corps, U.S.N.

The members of the Johns Hopkins University party are: Dr. R. L. Waterfield of Baltimore and Dr. Windham Lloyd of London, both noted astronomers.

 LAST month we advertised a Re-Perfected Pierce-Arrow sedan of the series "80" model for \$995. It was sold the same day. Others wanted it, but we had only the one.

Oakland's Navy Appears to Be White Elephant
 OAKLAND, May 5. (Exclusive)—Oakland has a navy but no crew. All it has is a land-going watchman and a few men are beginning to prove a problem.

The "navy" is the venerable coast guard cutter Bear, which Congress recently turned over to the city after urgent and widespread requests. After getting the cutter, however, the city found itself unable to decide what to do with it.

Meanwhile, all members of the ship's former crew have been transferred to other duty by Lieut. F. L. Austin, the former commanding officer.

Would Exchange Mail Order Mate
 CHICAGO, May 5. (Exclusive)—Mrs. Ellen Scott Quillen, 24 years of age, recently a school teacher of Albia, Iowa, doesn't think so much of mail order husbands. She was married Tuesday morning, beaten up Tuesday night and today was in court as complainant against her husband, Walter Quillen.

Doctor Sends New Truss on Trial
 No Money Down Required; No Cash Deposit; No C.O.D.
 KANSAS CITY, Mo. (Special)—Having invented a rupture appliance with no leg straps, no elastic belt, no cruel spring bands, no hard coughing pads, an unusual offer is now being made by the Hernia Specialist, Dr. Andrew Kaiser, 1812 Koch Building, 2906 Main Street, Kansas City, Mo.

Without a cent in advance, no cash deposit, no C. O. D., he will send his appliance for 30 days' trial. Hundreds of people, many with double rupture of long standing, have declared it brought them quick improvement and freedom from the humping and discomfort of previous truss wearing.

Pastor Refuses Salary Boosts
 EVERETT (Mass.) May 5. (AP)—For the second time Rev. Arthur Hopkinson of the Glendale Methodist Church has declined an offer of a salary increase of \$500 from the official board.

Quoting the words of St. Paul, Mr. Hopkinson told the board: "I seek not yours but you."

Mr. Hopkinson has taken the lead in a movement to free the church from debt by 1935, himself setting an example of generosity by his refusal to accept increased remuneration.

REVOLT QUELLED IN ITALIAN COLONIES
 (Copyright, 1929, by Chicago Tribune.)
 ROME, May 5. (Exclusive)—Ten days of severe and typical colonial military operations have been carried out in three phases over a nearly 800-mile front in the hinterland of Tripolitania and have been successfully terminated with heavy losses to the rebel Senussi tribesmen, according to the somewhat incomplete details given out today by the Italian government.

Both Are 35—One Looks 50

Personal Appearance

means much in social and business success

Don't Neglect Your Scalp

Youthful appearing men with good heads of hair have the decided advantage today in social and business life. Let the Thomas' help you retain or regain that head of hair with their fifteen year proved scalp treatment! This treatment overcomes the causes of premature loss of hair—dandruff, itching scalp, falling hair, and dry or oily hair and promotes hair growth.

It revitalizes the dormant sources of hair growth and actually makes it possible for new hair to grow. You want thick, luxuriant hair—evidence of youthful vigor—not thin, lifeless hair or a bald head.

Call today for an examination—there is no charge or obligation.

CIGARETTE ADS CREATE STATIC

Slogan Develops Fatal Interference

Roar Back Revises Tobacco Company Program

Smokeless Music Will be Future Offering

(Copyright, 1929, by the North American Newspaper Alliance)
 WASHINGTON, May 5. (Exclusive)—The way the public acts as its own censor of radio programs is pointedly illustrated by the change instituted in the character of the announcements interspersing the Saturday night orchestral program sponsored over the nationwide network of the National Broadcasting Company by the American Tobacco Company. Advertising of cigarettes, including paid testimonials from athletes, actors and other celebrities, to which objections were raised, have been omitted from the program, and, although no announcement of its intention was made by the company, they probably will be heard no more.

SLOGAN REVISED
 The slogan urging the listener to reach for the cigarette instead of a sweet, was abbreviated in last Saturday night's program to the simple suggestion to reach for the cigarette. The new slogan, "Reach for the cigarette," had been joined by health, church and women's societies and various other protesting groups in objecting to the advertising. The protests were made on health grounds and on the theory that indirect suggestions upon other industries constituted unfair competition.

Even the Federal Radio Commission had threatened to take a hand. Although without power to censor program material, the commission proposed to hold a public hearing in Washington on the subject to determine whether the station members of the chain were acting in the public interest in broadcasting the announcements.

MORAL FORCE
 The moral force of the Federal radio authority was exerted to obtain a change in the advertising methods. It is apparent that the altered announcements came as a result of pressure from this source, from the stations taking the programs and from the chain management. The stations and chain were under considerable pressure from the listening public, signs with the company itself. Station WJAM, Cleveland, several weeks ago, refused to continue the contract for the program of popular dance music, despite its popularity as an entertainment feature, and withdrew from the chain for that hour. Other stations threatened to follow suit.

Gratification was expressed today by Chairman Ira E. Robinson of the Federal Radio Commission, who said he regarded last Saturday night's announcement as "a decided improvement." Judge Robinson said the whole incident has revealed how a determined public sentiment can control broadcasting. The same sentiment was expressed by Commissioner H. A. LaFount. He had urged the National Broadcasting Company, which has the right of censorship, to insist that the client make the change.

CONFERENCE WILL HEAR WEST'S LORE

Historians Will Be Heard at Colorado Meeting in June

BOULDER (Colo.) May 5. (Exclusive)—History of the trans-Mississippi west will be reviewed at a conference of historians at the University of Colorado June 18 to 21. Leading authorities on the historic lore of western half of the United States will contribute talks and papers. Among them will be Dr. Frederick Jackson Turner, retired Harvard professor; Prof. Herbert E. Bolton and Prof. Carl Sauer, University of California; Dr. Solon J. Buck, superintendent of the Minnesota Historical Society; Prof. W. P. Webb, University of Texas; Prof. Frederick L. Paxson, University of Wisconsin; Dr. Joseph Schafer, superintendent of the Wisconsin State Historical Society.

Also Prof. Colin B. Goodykoontz, University of Colorado; Prof. G. J. Garrahan, S. J., St. Louis University; Prof. Archer B. Hulbert, Colorado College; Prof. Louis Pelzer, University of Iowa; Dr. Leroy Hafen, historian and curator of the Colorado State Historical Society; Prof. John C. Parish, University of California at Los Angeles; and Prof. Lucy L. Hazard, Mills College, Oakland, Cal.

Hunt Starts for Missing Vessel

CAPTOWN (South Africa) May 5. (Exclusive)—It was officially stated by the admiralty at Simon's Town that the Clan liner Halesus which left Capetown Saturday for South America, has been instructed to search Gough Island and the vicinity of Tristan Da Cunha for signs of the missing København.

The København, belonging to the Danish East Asiatic Company, left Buenos Aires December 14 for Adelaide, Australia, carrying sixty cadets, and has not been heard from since.

Airplane Will Transplant Fish

ASTRAKHAN, May 5. (Exclusive)—Airplanes will be used to plant live herring eggs in the Sea of Aral, which now seems not to possess a single herring.

The herring roe will be flown 720 miles from the Caspian Sea, where herring abound. The flying time is estimated at about eight hours. Planes are to be used because ordinary transportation of the roe failed to produce any herring in the Aral, and experts believe it was because the journey was too long.

JUDGE KILLS SON-IN-LAW

Youth Sent by Mother to Confess His Elopement With Jurist's Daughter Shot Dead

AMARILLO (Tex.) May 5. (Exclusive)—Tom Walton, Jr., 21 years of age, shot to death by R. H. Hamilton, former judge of the Texas Supreme Court's Commission of Appeals when, with a jest barely off his lips, he entered Hamilton's office presumably to tell of a secret marriage with the attorney's daughter, was sent on the fatal errand by his mother.

The mother had been worried because Walton had kept secret his wedding to Theresa Hamilton, 19, which occurred February 10, while the two were students at Texas University.

"Go and see the judge," she told her son. "He'll be sensible and everything will be all right."

So Walton walked into the office yesterday saying carelessly to Miss Evelyn Watley, a stenographer, "If you hear some shooting, you'll know I've been shot." A few minutes later Hamilton shot him four times, surrendered and made only this explanation: "I had rather die than kill a man, but I had to protect my family."

The lawyer, a prominent man in Amarillo, was released under \$20,000 bond, waived preliminary hearing and will be taken before a grand jury probably this week.

Mrs. Hamilton and Theresa had been in Austin where the university is situated, since January. The daughter, whose marriage took place at Georgetown, near Austin, was a patient in an Austin hospital recently, friends said. Walton's parents operate a hotel.

HOOVER HONORED
 ST. LOUIS, May 5. (Exclusive)—President Hoover and Vice-President Curtis have accepted associate memberships in the Missouri Ozark Chamber of Commerce, according to a statement of A. D. Sheppard of Doniphan, Mo., secretary of the organization. The Chamber of Commerce, Sheppard said, plans to invite President Hoover to cast a line in the Ozark streams.

ST. LOUIS, May 5. (Exclusive)—The authors of the report were that "many candies are improved by the addition of fruit and several excellent candies consisting entirely or principally of fruit can be made. Fruits contain invert sugar, which is readily digested; mineral salts that tend to counteract the acidity resulting from a meat and cereal diet; fruit acids that are beneficial to health; and some fruits an important amount of vitamin, which is of particular value to children."

FIRE RATE OF STATE FLAYED

Greatest in Union, Declares California Educator

Prof. Crocheron Stresses Need of Preventive

Demonstrations Hoped to Reduce Losses

BERKELEY, May 5. (Exclusive)—California has the worst fire record of any State in the Union, according to Prof. B. H. Crocheron, director of extension work at the University of California college of agriculture.

In his monthly report, Prof. Crocheron avers that preventive measures and proper fire-fighting equipment would go far to reduce the annual losses from fires, saying in part:

"Last year there were 4171 fires, which burned over 1,560,000 acres of forest, brush, grass and grain in California, causing the loss of over \$2,750,000 worth of property. More than 80 per cent of these fires were preventable, as man-caused fires made up nearly \$2,300,000 worth of the damage. This does not include the large loss of farm buildings due largely to careless handling of petroleum products, defective chimneys and flues, matches, smoking and other results of carelessness or inattention to the clean-up of fire hazards."

The agricultural extension service of the University of California has been carrying on a campaign of fire-protection education for eleven years and this year is attacking the problem by a series of demonstrations to be held in twenty-eight counties in advance of the fire season.

EDUCATORS URGE FRUIT IN CANDY

Healthful Qualities in Sweets Related by U. of C. Attaches

BERKELEY, May 5. (Exclusive)—Too little use is made of the healthful qualities of fruit in the manufacture of candies, either commercially or in the home, according to a report by Associate Professor W. V. Cruess and Agnes O'Neill, of the fruit products laboratory of the University of California college of agriculture.

Prof. Cruess points out that the total annual consumption of commercially prepared candy is \$25,000,000 or almost fourteen pounds per capita. Yet little or no fruit is used in most candies, whether commercial or home made.

The authors of the report were that "many candies are improved by the addition of fruit and several excellent candies consisting entirely or principally of fruit can be made. Fruits contain invert sugar, which is readily digested; mineral salts that tend to counteract the acidity resulting from a meat and cereal diet; fruit acids that are beneficial to health; and some fruits an important amount of vitamin, which is of particular value to children."

"They're all good cigarettes, chief, but this one is a pippin!"

115 men in the Mt. Clare B & O shops, in Baltimore, test the 4 leading cigarettes

"Why should I change?" says the average smoker, when someone suggests another cigarette.

"I'm used to my brand . . . and it's a good smoke."

Of course it's good. Not even Old Man Habit can hold a smoker to a poor smoke. But being used to an old thing often keeps a man from getting acquainted with a better one.

That's the reason for these "concealed name" cigarette tests now going on all over the country. To give a man a chance to find out, on the level, which cigarette his taste really does like best.

Look what happened at the Mt. Clare shops of the B & O in Baltimore, the other day. Most of the fellows had been smoking that old favorite (let's call it Brand Y) for years. But when Chairman of Machinists, James E. Poulton, handed out the four leading cigarettes with paper "masks" over the names, 57 out of 115 picked OLD GOLD as the best cigarette. It was a walkaway for OLD GOLD!

"That only proves," said one of the chief mechanics, "that a fellow misses a lot if he gets too set in his ways."

NAVAL POWERS LIKELY TO MEET

Arms Conference of Five Nations Expected

Agreement Through Notes Deemed Impracticable

Geneva Delegates Discuss Adjourning Today

GENEVA, May 5. (P)—A disarmament meeting of naval experts of the five large sea powers, probably in Washington, promises to be a feature of coming disarmament negotiations. A delegate of one of the maritime nations expressed the opinion tonight that it will be impracticable to conduct the slated conversation between Britain, the United States, Japan, France and Italy by long-distance exchange of written communications.

He therefore foresees the likelihood when the governments have completed their studies of the recent American suggestions that the experts will be obliged to group themselves around a table and talk. That is deemed a common sense method of achieving preliminary agreements on the naval problem.

DELAY LIKELY. The preparatory commission for a disarmament conference probably will adjourn tomorrow after reaching agreement to postpone further detailed consideration of the naval question. The delegates of all naval powers plan to advocate such action.

Japan, Great Britain, France and Italy are expected to emphasize the necessity for time to subject the American ideas to technical scrutiny, especially the suggestion concerning limitation of strength of fleets by a formula of equivalent tonnage. If the hoped-for agreement is reached, the big five plan to notify the president of the preparatory commission who then can summon the commission to complete its work of preparing a draft treaty for reduction of armaments.

LINK WITH LEAGUE. Should such a conference eventuate, it is planned to link it up with the League of Nations and also with a general conference on land and air armaments which also will be held in Geneva.

It still is confidently anticipated that France will announce another convention before adjournment by agreeing to abandon its project for international control of armaments. It is thought that this will improve the chances of success of the proposed international conference which many believe can hope to achieve nothing more than stabilization of land armaments under present conditions.

The naval powers, however, are expected to contribute reduction of the fleets to the cost of disarmament. The present plan is to hold a series of international conferences with each one improving on the modest start which the first conference is expected to register.

NINE GIVEN PAROLES AT SAN QUENTIN

Deportation Ordered for Fourteen as Board Acts on Eighty-five Cases

SAN FRANCISCO, May 5. (Exclusive)—Eighty-five cases were acted on during the Saturday and Sunday sessions of the Board of State Prison Directors sitting at San Quentin. Nine paroles were granted, fourteen prisoners ordered deported, twenty-five were denied and thirty-four were assigned paroles at a future date.

Grace and Blanche Stauber, sisters of Los Angeles, 54 and 45 years of age, respectively, were paroled after serving fifteen months on a sentence of from one to twenty years for forgery.

The women pleaded to have their cases disposed of at the same time, declaring they had spent their entire lives together and either wished to remain in prison or to be paroled at the same time. They formerly were school teachers, who went into the real-estate business on a small scale and when they lost their business became involved with fictitious checks.

They were sentenced to four years, and will be on parole for three years and nine months.

Among other sentences fixed and paroles granted are: Frank Zash, manslaughter by automobile, Los Angeles, three years; Harry Brown, Los Angeles, bad checks, three years; J. L. Smith, Riverside, stolen automobile, three years; Marion De Wit, Imperial county, possession of a still, three years, and Arthur Mendosa, Los Angeles, possession of a still, three years.

Bay City Forms Breakfast Club

SAN FRANCISCO, May 5. (Exclusive)—A San Francisco organization in emulation of the Breakfast Club of Los Angeles, but under a different environment, is to be established here, according to a notice filed in Superior Court by Dr. Francis H. Redewill, physician. The notice was filed to prevent use of the name by another organization.

The club, Dr. Redewill said, will meet around the swimming pool of the Fairmont Hotel, and will be devoted to entertainments, discussions and the reception of notable visitors.

PLANE CATCHES FIRE; PASSENGERS UNHURT

PALO ALTO, May 5. (P)—Three passengers in a monoplane piloted by Lieut. W. H. Brown, former British flying ace, escaped uninjured today when the plane caught fire after taking off from the Palo Alto School of Aviation Field. Brown was slightly burned.

SANTA FE MAY BE INTERVENOR

Support of Road Junction Indicated

Great Northern Seeks Entry to California

Western Pacific Head in Los Angeles

BY FLOYD J. HEALEY

"Times" Staff Correspondent

SAN FRANCISCO, May 5. (Exclusive)—H. M. Adams, president of the Western Pacific Railroad Company, and Judge Frank M. Angellotti, general counsel, went to Los Angeles tonight, leaving in their wake a report that the Santa Fe Railroad may act shortly as an intervenor in the Interstate Commerce Commission in the application of the Western Pacific and Great Northern to connect their lines in Southern Oregon and Northern California. The report is as yet unverified, but is considered in railroad circles to contain more than a modicum of verity because of recent happenings in the preliminaries of the forthcoming legal battle by the Southern Pacific to prevent the connection.

Chief of these is the recent rate agreement consummated between the Santa Fe, Western Pacific and Great Northern.

Adding strength is the announcement at Western Pacific offices today that the Spokane (Wash.) Chamber of Commerce has applied to the Interstate Commerce Commission to intervene in the proposed connection on behalf of the Great Northern and Western Pacific. The petition for intervention was granted, according to the announcement.

President Adams and Judge Angellotti plan to appear before the Los Angeles Chamber of Commerce, probably on Wednesday of this week, and it is presumed their visit to this body will be to discuss what they consider the mutual benefits of trade interchange between the Pacific Northwest and northern border tier of States on the one hand and the Pacific Southwest on the other.

Duke of York in Auto Crash

LONDON, May 5. (P)—The Duke of York, second son of the King, was in a motor accident last night. He was returning to London, when his automobile and a motorcycle with side car collided.

No personal injuries were suffered, and the vehicles were damaged only slightly. The Duke continued his journey, after satisfying himself that the driver of the motorcycle was not injured.

DIAMOND BOOTLEGGING GRIPPING SOUTH AFRICA

(Copyright, 1929, by Chicago Tribune.)

BY FRANK BURTON

CAPETOWN (South Africa) May 5. A diamond expert just returned from Namaqualand states that illicit diamond buying is rampant there, not only in state diggings and those belonging to Consolidated Diamonds of South Africa but from farmers in the inland who sink wells looking for water but take out stones in thousand carat sizes. These they openly offer for sale to travelers.

In a month the people of Namaqualand are either rich or poor, some farmers riding about in expensive motor cars where before they had wagons. The early days of Kimberly are completely eclipsed and the government will require a whole army to stop the illicit diamond dealing.

Justice Hutton, discharging a jury in West Griqualand criminal sessions today said the extraordinary feature of the calendar had been the large number of illicit diamond cases.

The recent discovery of so many alluvial diamond fields is considered a calamity rather than a blessing to the country. One finds men who hitherto led blameless lives giving away to temptations in a frantic haste to acquire wealth which the discovery of the rich fields cause. People are leaving their occupations in South African diggings to partake in the terrible gamble. A very small proportion are successful, the majority being reduced to a state of dire poverty.

Revolutionary Flare Illumines Sixty-six Miles

SCHENECTADY (N. Y.) May 5. (P)—Automatic airway lighting is carried one step further in a new type of revolving beacon developed by the General Electric Company.

All the moving parts are completely housed in a heat-resisting glass dome, a protection against the weather. There are two 1000-watt lamps, with an automatic mechanism arranged so that if one burns out the other is swung into focus, without waiting for arrival of the repair man.

The light is visible in clear weather or sixty-six miles.

The "Last Spike" will never be driven

—Southern Pacific still building with the West

THE 60th anniversary of the driving of the Golden Spike, May 10, Southern Pacific's Golden Jubilee, finds this western railroad still building. Weighed with crude tools, courage and vision, the early pioneer had hand-carved a way to the new West. With the vision of the pioneer, the West has carried on, and with it, step by step, Southern Pacific has built.

In the last five years Southern Pacific has built more new line than any other railroad in the United States.

In fifteen years Southern Pacific has built 1481 miles of new line at a cost of 88 million dollars.

Through the barrier of the mighty Cascades it has created a new north and south railway. It has double-tracked its OVERLAND ROUTE line over the Sierra.

RECLAMATION SURVEY WINS

Wilbur Approves Review of Bureau's Work

Data Obtained Will Aid Bettering Conditions

Klamath Project to Come Under Consideration

WASHINGTON, May 5. (AP)—An economic stock taking of the work of the Reclamation Bureau of the Department of the Interior has been approved by Secretary Wilbur and will be carried on this summer.

The survey, as announced by Commissioner Edward Mead, is to include certain completed Federal projects, others where work is under construction and several private projects in financial distress for which government aid is asked.

A large part of the work will be done by the staff of the reclamation bureau and three experts will be brought in to aid in the study, Mead said. Two of these, Dr. Alvin Johnson of New York and Prof. Frank Adams of the University of California, already had been selected.

"Many factors enter," Reclamation requires more than canals and reservoirs," Mead said. "Qualifications of settlers, the kind of agriculture that should be followed and in general those factors which determine earning power and well-being and contentment of the people of the communities created are as important as the engineering factors."

"The results on a majority of the Federal reclamation projects fully justify the national policy. A great wealth in land has been created, farmers are prosperous and the pay-

ments required under the contracts are being made. There are other projects, however, where development has been slow, where settlers are struggling in all stages of discouragement and hardship and where delinquency in payments has been an inevitable result."

DATA TO BE HELPFUL. "The making of this investigation at an early date is regarded as desirable because the data which is proposed to gather will be most helpful in determining what can and should be done to improve conditions and in aiding Congress in enacting desirable legislation."

The studies will include: The Stansfield and Westland districts in Oregon; the Bitter Root district in Montana; the Gern and Emmet district and the King-Hill projects in Idaho; the Orchard Mesa division of the Grand Valley project in Colorado; the Shasta View district of the Klamath project, Oregon, and California; the Owyhee project, Oregon-Idaho; the Northport division of the North Platte project, Nebraska-Wyoming; the Sun River, Milk River and Lower Yellowstone projects in Montana; the Willwood division of the Shoshone project, Wyoming.

RED CAPITAL HAS HECTIC FETE NIGHT

Processions by Religious and Antireligious Groups Marks Passover

MOSCOW, May 5. (AP)—Through-out Saturday night this city was in the throes of a clash of religious ideas that required extraordinary police precaution to keep order. The occasion was the twelfth post-revolutionary Passover.

Countering night-long requiems and processions around the churches, young Communist army units in a huge torchlight parade with blaring bands marched through the city with antireligious banners and caricatures singing revolutionary songs.

The opposing groups converged at the magnificent Church of Our Savior overlooking the Kremlin on the one hand and in Ekaterinsky Square on the other. At the latter place many antireligious speeches were made.

The theaters were kept open all night with dancing between the performances.

COCKLESHELL CROSSES SEA

Paul Muller Sails Boat From Hamburg to Cuba; Lone Mariner Second to Achieve Feat

GIJARA (Cuba) May 5. (AP)—Paul Muller, German sailor, has arrived here after a safe crossing of the Atlantic in a twenty-two-foot lifeboat called the Aga. He used a sail as well as oars to propel his craft. So unexpected was his appearance that he was detained yesterday because of lack of papers. He continued toward Havana today.

He left Hamburg, Germany, July 1928, and cruised leisurely down the coasts of Europe and Africa until at Tenerife, in the Canary Islands, he took aboard supplies and pointed his small craft toward the opposite shore of the Atlantic. He had reached the Canary Islands February 2, 1929.

Muller, who is 43 years of age, expects to reach Havana late this week and will then sail for New York. He already is planning a return trip to Germany over a more northerly route that will bring him to England.

Although Muller had shown sufficient foresight to provide him with

men required under the contracts are being made. There are other projects, however, where development has been slow, where settlers are struggling in all stages of discouragement and hardship and where delinquency in payments has been an inevitable result."

DATA TO BE HELPFUL. "The making of this investigation at an early date is regarded as desirable because the data which is proposed to gather will be most helpful in determining what can and should be done to improve conditions and in aiding Congress in enacting desirable legislation."

The studies will include: The Stansfield and Westland districts in Oregon; the Bitter Root district in Montana; the Gern and Emmet district and the King-Hill projects in Idaho; the Orchard Mesa division of the Grand Valley project in Colorado; the Shasta View district of the Klamath project, Oregon, and California; the Owyhee project, Oregon-Idaho; the Northport division of the North Platte project, Nebraska-Wyoming; the Sun River, Milk River and Lower Yellowstone projects in Montana; the Willwood division of the Shoshone project, Wyoming.

WISCONSIN BOY DIES

OF UNUSUAL DISEASE

APPLETON (Wis.) May 5. (Exclusive)—A strange disease, known as purpura, which causes its victim to turn purplish color and to bleed to death internally, caused the death of a 16-year-old boy, Lawrence Smith, at his home at Wolf River, near here. The disease, according to attending physicians, is very rare. One of the doctors said he has seen only three cases in thirty years of practice. An infection caused the disease, which never always is fatal.

BORSE LATS LESS

NEW YORK, May 5. (Exclusive)—Use of gasoline power instead of corn and oats translated into old-fashioned horsepower is estimated by Dr. William Crocker of the Boyce Thompson Institute to release 500,000,000 bushels of grain annually for human food.

EX-EMPRESS IN HIDDEN RETREAT

Zita Seeks Seclusion Amidst Rural French Scenes

PARIS, May 5. (Exclusive)—A tiny village in the French Alps discovered the other day that all winter it had unknowingly been sheltering the ex-Empress Zita of Austria, with Prince Otto, heir presumptive to the crown of Hungary, and her seven other children. Recognized at last by a young Hungarian girl, the ex-Empress is leaving in a few days for Hendage on the Spanish frontier, declaring that her self-imposed exile has been in vain, and that it wasn't worth hiding herself.

Under the name of the Countess De Luzaco, Zita rented a sixteen room villa at the beginning of the winter in this little town near Grenoble. The villa was undoubtedly selected because it was perched so that the one mountain path leading to it is viable for a mile from the widow, and it is impossible, therefore, for visitors to reach the house without being seen.

San Francisco Hotels

ALL OVER THE WORLD THEY KNOW THE PALACE HOTEL

Wherever travellers gather and conversation turns to discussion of the world's great hotels, the Palace is mentioned. Some praise the personal attentiveness, others the cuisine. Some speak of the restful guest rooms, others of convenient location close to business, theatrical, shopping district.

All rooms with Private Bath. Singles: \$4, \$5, \$6. Doubles: \$6, \$7, \$8, \$10. Suites from \$15.

In San Francisco it's the PALACE HOTEL. An American Tradition.

EX-EMPRESS IN HIDDEN RETREAT

Zita Seeks Seclusion Amidst Rural French Scenes

PARIS, May 5. (Exclusive)—A tiny village in the French Alps discovered the other day that all winter it had unknowingly been sheltering the ex-Empress Zita of Austria, with Prince Otto, heir presumptive to the crown of Hungary, and her seven other children. Recognized at last by a young Hungarian girl, the ex-Empress is leaving in a few days for Hendage on the Spanish frontier, declaring that her self-imposed exile has been in vain, and that it wasn't worth hiding herself.

Under the name of the Countess De Luzaco, Zita rented a sixteen room villa at the beginning of the winter in this little town near Grenoble. The villa was undoubtedly selected because it was perched so that the one mountain path leading to it is viable for a mile from the widow, and it is impossible, therefore, for visitors to reach the house without being seen.

San Francisco Hotels

ALL OVER THE WORLD THEY KNOW THE PALACE HOTEL

Wherever travellers gather and conversation turns to discussion of the world's great hotels, the Palace is mentioned. Some praise the personal attentiveness, others the cuisine. Some speak of the restful guest rooms, others of convenient location close to business, theatrical, shopping district.

All rooms with Private Bath. Singles: \$4, \$5, \$6. Doubles: \$6, \$7, \$8, \$10. Suites from \$15.

In San Francisco it's the PALACE HOTEL. An American Tradition.

HOLLYWOOD YOUTH FIGHTS DUEL FOR HAND OF GIRL

(Copyright, 1929, by New York Times.)
PARIS, May 5. (Exclusive)—A wealthy young American, the son of a noted film director who died in Hollywood several years ago, fought a duel with a prominent Frenchman in the Bois Du Boulogne at 5 o'clock this morning, as the culmination of a quarrel over a pretty American girl, who is a student at the Sorbonne.
Conforming faithfully with the best traditions of French duelling, the adversaries, accompanied by their seconds, stood on the outskirts of the woods just as day was breaking and fired point blank at each other from a distance of fifty paces.
Both shots went wild and the young men separated without the usual reconciliation.
The girl, who had been the companion of the Frenchman last evening at a Montmartre dancing club, heard of the duel and rushed madly to the hotel of the American. She found that he had already returned from his adventure, had bathed, changed his clothes and was prepared to take the boat train for Cherbourg, where he was scheduled to sail on the Atlantic tonight.
A few minutes later she accompanied him to the station and bade him a fond good-by. Friends explained later that her engagement to the Frenchman, if any actually existed, may now be considered as ended.
Arriving here twelve days ago on the Belgium after a world tour, the young American was introduced to the 20-year-old American girl. It was a case of love at first sight, so friends say, but the American soon found that the Frenchman, a member of an old family, deeply resented his attentions.
Feeling the girl was more attracted by her countryman and unable to stand the strain any longer, he challenged the American to a duel.
The girl returned to her studies at the Sorbonne today and announced that her engagement to the Hollywood boy could soon be expected to give the story the necessary happy ending.

Poll Designates Crime as Most Acute Problem

WASHINGTON, May 5. (P)—Crime with disrespect for law was voted the paramount problem before the people of the United States in a poll conducted by the executive council of the National Economic League.
In the results announced today, administration of justice ranked second as a major problem and prohibition third. Prevention of war, taxation, education, the tariff, public health and national debt ranked in the order named.
The executive council is composed of John Hays Hammond, William Allen White, Charles M. Schwab, James Rowland Angell, A. Lawrence Lowell, Roger W. Nelson, Frank O. Lowden, David Starr Jordan, Edward A. Pison, George W. Vickersham and Nicholas Murray Butler.

Congressman Dies in Panama

WILKES-BARRE (Pa.) May 5. (P)—The death of Representative John J. Casey of the Twelfth Pennsylvania Congress District at George Hospital, Canal Zone, today is announced in a cablegram received by his brother, Lawrence Casey.
Mr. Casey was elected to the Sixty-third Congress in 1912, and was re-elected to the Sixty-fourth, Sixty-fifth, Sixty-sixth, Sixty-seventh and Sixty-eighth Congresses. In the 1928 campaign he won all nominations.
He also was president of the State Federation of Labor.

Asylum Blaze Perils 4000

MORRISTOWN (N. J.) May 5. (P)—Four thousand inmates of the New Jersey State Hospital for the insane were aroused early this morning when one wing of the institution was burned. Screaming in fright, inmates were removed to safety from rooms threatened by flames. The blaze could be seen for miles.
Fire walls prevented the blaze from spreading from the section in which it originated. The blaze was brought under control quickly with loss estimated at \$100,000.

Auto Collision Kills Couple

PORTLAND (Or.) May 5. (P)—Thrown from their touring car after it collided head-on with a milk truck, Mr. and Mrs. Albert L. Ruit, Portland, were killed today on the Beaverton-Hillsboro highway.
Mr. and Mrs. Ruit were driving their automobile west on the highway when they turned out to pass a farm wagon. Coming east was a milk truck driven by H. J. Malter of Banks, whose efforts to avoid a collision by driving into a ditch were in vain.

Revue Number on Duce Deleted

LONDON, May 5. (Exclusive)—Miguel Matos, well-known playwright, included a scene in his latest revue "Morning, Noon and Night" due for Little Theatre production on Thursday, depicting Premier Mussolini at home, the idea being to show that even dictators sometimes are overcome by their wives and families. But the Lord Chamberlain does not think the Italian Premier would like it, so he has exercised his censor's powers and ordered the offending scene cut out.

Child Scalded to Death in Tub

PITTSBURGH (Cal.) May 5. (P)—Glady Crumley, 3-year-old daughter of John Crumley, fell into a tub of boiling water today and was burned so badly she died before reaching the hospital.
The child's mother was washing clothes in an auto camp near here when the girl stumbled and fell into the tub.

TWO MANILA OFFICERS AND WIVES IN CRASH

MANILA, May 5. (P)—Maj. and Mrs. Warner Carr and Lieut. and Mrs. Albert Gellay were seriously injured yesterday when their automobile went over a precipice thirty-eight kilometers north of Baguio, Island of Luzon. Mrs. Carr suffered a compound fracture of the leg and other injuries. She may die. The others were injured less seriously. Maj. Carr is attached to the Thirty-first Infantry here.

DEVELOPERS TO CHOOSE BOARD

California's Organization Picks Directorate
SAN FRANCISCO, May 5. (Exclusive)—Coincidentally with announcement of the annual election of directors for the California Development Association, the State Chamber of Commerce, to be held on the 13th inst. at the headquarters in the San Francisco Ferry Building, the nominating committee today submitted the following names for balloting:
Los Angeles — Arthur S. Bent, George I. Cochran, George L. Eastman, William May Garland, Clinton E. Miller, E. W. Murphy and Harry Chandler.
San Francisco — F. W. Bradley, Robert Caldwell, A. B. C. DeLong, R. E. Fisher, E. B. Hale, Frederick J. Koster, J. B. Levison, Paul Shoup, Charles E. Virden, Oakland — Joseph R. Knowlton, Sacramento — Fred W. Kiesel, Redding — Dudley V. Bailett, Stockton — Hubert H. Briggs.

WALL STREET OPERATOR CONFIDENCE MEN'S VICTIM

(Copyright, 1929, by New York Times.)
LONDON, May 5. (Exclusive)—Sir C. Biron, a London magistrate, laughed incredulously today when told that two men before him had taken \$10,000 "by the oldest confidence trick in the world" from a Wall street stock broker. The stock broker was Charles Swayne Phillips, a New Yorker, and Judge Biron said his experience should be a warning to American visitors to whom the trick seemed to have a peculiar fascination.
A detective who had been watching the movements of Samuel Melaney, a commercial traveler, and Harry Baker, a railroad constructor, in a West End hotel said they told Phillips that Melaney had been left a fortune of \$3,000,000 under an uncle's will on condition that he gave \$500,000 to deserving poor. Melaney offered Phillips \$10,000 to distribute in New York. Phillips, to show he was a man of substance, handed over another \$10,000 whereupon the detective intervened.
The judge exclaimed laughingly "surely Mr. Phillips isn't a stock broker on Wall street?"
The defending counsel replied: "You can scarcely believe it. The men's defense is that they were tempted to play the trick on this strikingly dressed man who was telling everybody how much money he had got."
Fremont — A. Emory Wilson, Bakerfield — Alfred Harrell, Santa Paula — C. C. Teague, Long Beach — C. A. Buffum, Chico — R. A. Condon, San Diego — Frank J. Belcher, Jr.
As in past years, selection of the nominees was made in recognition of "valuable State-wide services" and in the endeavor to assure continuation of policies which will be representative of all sections.

QUIET PREVAILS AS FRENCH VOTE

Count Indicates Victory for Moderates
PARIS, May 5. (P)—Country-wide municipal and departmental elections progressed throughout the day with the greatest calm in spite of the particularly bitter campaign which preceded them. No disorders were reported anywhere.
The first returns tended to show a victory for the moderate parties. Only one Communist was elected out of more than 300 contests on which early returns were made. Complete figures for several hundred seats as municipal councillors and departmental representatives showed an immense majority for the center groups.
Municipal pollsters in France have a close relation to the Federal situation as the representatives elected today later will elect the members of the next national Senate.

What Detroit thinks

We Went to Hollywood
The Land of Charming Youth
for Junior Misses' Frocks

Now they have arrived
in the Junior Misses' Shop

Here are frocks that were designed especially for the youthful stars and satellites of Hollywood. There are formal afternoon frocks of crepe Elizabeth or chiffon, and semi-dress styles of flat crepe.

bodices, high waistlines, and circular skirts enhance the rounded young figure. Little jackets may be moved to reveal a sleeveless dinner frock. Ruffles shimmering as you dance or walk. Necklines demure.

They're entirely picturesque and artful. Those flaming red, pigeon gray, sunbeige, navy blue, Madonna blue, and green. Prices from \$25 to

—from an advertisement in the Detroit Times — a newspaper of very large circulation — of the J. L. Hudson Company, third largest department store in the United States—

—proudly announcing the return of their buyers from Hollywood... land of charming youth... playground of the stars... style center of the world... with the latest creations in frocks as an offering to fastidious Detroit taste—

—a timely modern gesture by great merchants to the elect of their clientele... a gesture so significantly successful that the air-mail and the telegraph have brought constant repeat orders to Hollywood... a first visit by buyers of the Hudson Company that will be repeated regularly from now on—

—and this is the story of but one great store in the East and Middle West whose buyers made their first visit to Hollywood... who found here an amazingly rich mine of style merchandise... who sigh now for those Paris pleasure trips of yesteryear... but who look upon Hollywood as the brightest, rising star of style... upon Hollywood Boulevard as the acknowledged style center of the world!

 conditions have been of the
 Everything for the laborer
 has been provided by the
 owners, their health, home
 amusements and even educa-
 tion of the various activities
 of the factory.

POOR SAVINGS BANK

the savings bank was organized for the workers. The average workman spends his money miserly and does not know how to save. Many of them have money and the Chicago banks charge ruinous rates of interest, sometimes as high as 12 per cent per month. In view of this the factory workers organized the workers could borrow money when it was really necessary at a nominal rate of interest. The laborers were encouraged to save money and were paid a reasonable rate of interest on the money in the factory bank.

The factory store was opened. The workers could go a considerable distance from the business of the city where the workmen go for their daily needs. Factory owners realized that the workers could be controlled if they invested in this way so the store was organized and run on the cooperative basis. The workmen were urged to invest their capital in the store, but they could not invest as little as \$10 so as to avoid getting control. The business of this store was very profitable.

The workers patronized the store because it was convenient for them because they knew that the goods were good and as cheap as they could possibly get them.

FREE EDUCATION

In addition to these things the workers were offered free education for their employees. A class for apprentices was started first. This was compulsory, but lasted only a few hours. Everything was arranged by the factory, the teachers were not out of pocket and even the hour spent in school was taken from their regular working day.

An hour a day, taken from the working time, was also devoted to athletics and various forms of recreation. Lectures were given on literature, arts and crafts by competent and women. An effort was made to discover what the mass of the workers were interested in, and talks were given on these subjects.

There were also classes in sing-song, arithmetic, geography and other subjects. A small hospital was opened on the factory grounds where the workers were given treatment. At this time the factory.

gave the workers health insurance which greatly benefited them. A man paid 20 cents a month and toward the end of the year a fund was set up to be used for aid to the workers who were sick or went down with illness. The sick man paid 20 cents per day and in addition 20 cents per day to his family. This was paid

WORKSHOPS BUILT
The new bath house was a dining-room built on the ground floor for the laborers. The upper floors were also built so that workers could live free of the city.

These things were carried on for years—until the year of last year when the Nationalists came to power in the early part of 1926. A few weeks' time was given for the workers to form unions and for this and that. Great strikes were made upon the factory from day to day. In the factory were taken over and run by the workers themselves and the owners allowed upon the factory.

The Yenching Rug Factory was hit by labor troubles. The factory opened it was the first of its kind in the city. But they were not satisfied with the wages. They went on strike several times. The owners met their demands. The conditions were not such that where it is impossible to do anything.

Everything is gone. The hospital, there were the workers even forced from the factory of charge and even that was a result.

In the ultimate result will be gone but the Communist movement is at its way more and more.

Southern California Net Play Starts

FAVORITES IN SOUTHLAND TENNIS CHAMPIONSHIPS

Here are Midge Gladman, University of Southern California sophomore, and Ben Gorchakoff, Occidental College senior, who are expected to figure heavily in the title play which starts today on the courts of the Los Angeles Tennis Club. Miss Gladman is one of the seeded players in the women's singles, and Gorchakoff is the defending men's champion.

STATE STARS IN TENNIS TOURNEY

Great Field in Quest of Southland Titles

Straford and Doeg to Play Thursday Morning

Kussman, Rizzo Favored to Win First Matches

The greatest field of tennis stars ever to participate in the Southern California open championships since the days of Midge Gladman and Thomas Bundy, former world champions, will open battle in the quest of the historic crown at the Los Angeles Tennis Club this morning.

The rackets of Gerald Straford, 5 and 6, and Johnny Doeg, Stanford University, will not finish on the local club courts until Thursday morning. The two favorites, top seeded players in the men's singles, will arrive in the city late Wednesday night, and the following day are expected to wait through a total of four matches to catch up with the field.

The same goes for Mrs. Marian Williams of La Jolla, recent conqueror of the Trojan star, Midge Gladman, seventh ranking United States player, who is seeded first in the women's singles, and Keith Gledhill of Santa Barbara, State senior and junior title-holder. Both Mrs. Williams and Gledhill are to perform in their initial title Wednesday.

But feature singles and doubles matches in all of the various divisions of play will not be lacking.

ENGLISH PROS ROUSE IRE TO REBUFF YANKEE STARS

"Do-or-Die Spirit" Fills John Bulls' Bosom as Home-Bred Aces Prep to Regain Classic Honors

BY FRANK H. KING. Associated Press Sports Writer

MUIRFIELD (Scotland) May 5. (P)—Great Britain's golfers were ready tonight to repulse all foreign attacks on the British open championship or else go down fighting.

Starting at 9 o'clock tomorrow, all the famous British pros and fifty of the nation's leading amateurs will start the first qualifying round for the championship proper. If today's weather is an indication, half the battle will be in weathering the wind and the rain of Scotland.

Bouyant over the British victory in the international team matches for the Ryder cup at Leeda, Britons have great hopes of keeping the championship for themselves this year despite the presence among the invading forces of the 1928 champion, Walter Hagen, his nine Ryder cup team-mates, a half-dozen "independent" American pros and the crack amateur, George Von Elm, former United States amateur title holder.

FORMIDABLE FIELD. The British will be as disappointed as they were surprised at the British open championship next week.

"The leading interest in the American invasion of 1928, of course, is in Horton Smith, that wonderful youngster from Wisconsin," Jones said. "I confess I am absolutely absorbed in his performance in Britain and I imagine most of the golfers of this country feel much the same about him. And for Horton's sake, I am very glad the British open is played this time at Muirfield, and not on one of the famous seaside courses."

Bobby pointed out that turf on the seaside courses is not nearly so thick and strong as on American courses, and the design of the courses is radically different from the British open championship next week.

(Continued on Page 12, Column 5)

(Continued on Page 12, Column 5)

(Continued on Page 12, Column 5)

BOBBY JONES FAVORS HORTON SMITH IN OPEN

ATLANTA (Ga.) May 5. (P)—Bobby Jones, twice winner of the British open crown, expressed the opinion tonight that young Horton Smith, who is seeded first in the British open, would be the chief threat to aspiring Britons in the British open championship next week.

"The leading interest in the American invasion of 1928, of course, is in Horton Smith, that wonderful youngster from Wisconsin," Jones said. "I confess I am absolutely absorbed in his performance in Britain and I imagine most of the golfers of this country feel much the same about him. And for Horton's sake, I am very glad the British open is played this time at Muirfield, and not on one of the famous seaside courses."

Bobby pointed out that turf on the seaside courses is not nearly so thick and strong as on American courses, and the design of the courses is radically different from the British open championship next week.

Hollywooders Release Pair, Sign Two Men

Before leaving for San Francisco last night to attend the ladies-free meeting, Bill Lane, boss of the Hollywood club, announced that Pitcher Walter Kinney had been handed his release and Pitcher Bill Murphy had been sold to Art Griggs of the Wichita club of the Western League.

Kinney, the portly southpaw who won sixteen games and lost seven for Hollywood last season, did not leave until two o'clock.

ANGELS SPLIT TWIN BILL

Marty Krug's Team Wins Series From Sacramento by Dividing Double-Header With Solons

SACRAMENTO, May 5. (Exclusive)—Los Angeles took the odd game of the series from Sacramento by breaking even in today's double-header. In the morning at Stockton, the Angels were shaded by the Solons in an eleven-inning tilt, 6 to 5, but coming back to Sacramento this afternoon, they stepped out to amass an early lead to ring up an easy 5-to-2 victory.

The Angels came from behind to tie up the morning game, in the ninth inning, but the ambition was spent in vain when Backer singled in the eleventh to score Hoag, a pinch-runner for Rohwer, who had walked and moved to second on a sacrifice. Hollings was charged with the defeat, after relieving Miller.

In the afternoon encounter, Norman Plitt, the bespectacled right-hander, hurled his best ball game of the season. He had the enemy nicely in hand at all stages of the encounter, and was helped out of three rather delicate situations by fast double plays executed by the Angel infield. Ray Jacobs, subbing for "Ducky" Jones at third, was the day's fielding star.

Although the Senators hit safely eight times off Plitt, all but three of the blows meant absolutely nothing. Dolph Camilli was Norman's principal thorn-in-the-side. In the fifth he drove out a double and scored on Keating's single, and in the ninth he hit a home run over the fence.

Uplifters Win Polo Tilt on Rogers' Goal

A goal from the mallet of Will Rogers, Jr., decided an exciting polo battle between the Uplifters and Buconians yesterday at the Rustic Canyon Field.

Young Rogers smashed the ball across the goal line, giving the Uplifters a victory by a 9-to-8 score just before the bell rang ending the eighth chucker. The teams were tied, 8 to 8, when the winning tally sailed across the goal line.

CARTER, CONGER MAY RUN AGAIN

Prep Officials Seek Star Milers for Another Race Next Saturday as Feature of State Interscholastic Meet at Coliseum; Argue Over Chaucer's Time

BY BRAVEN DYER

Nick Carter and Ray Conger, the two great milers who put on a sprinter's finish to their race at the Coliseum Saturday day, may meet again this weekend. Officials in charge of the State interscholastic meet, billed for Saturday at the Coliseum, are endeavoring to line up the two rivals for another engagement.

It is said that Carter gave his consent to another race and that Conger decided today or tomorrow, Nick naturally is satisfied with his showing, having given Conger his first trimming of the year. The Illinois A.C. star would like another shot at his rival so will probably consent to appearing Saturday.

ably he will make his decision today or tomorrow, Nick naturally is satisfied with his showing, having given Conger his first trimming of the year. The Illinois A.C. star would like another shot at his rival so will probably consent to appearing Saturday.

ALL EVEN. The two rivals now stand all even in their competition. Conger has won two races, while Carter has been victorious a like number of times.

Charles Borah, who pulled a muscle in his right leg when twenty yards from the finish of the 100-yard dash Saturday, had his limb treated yesterday by Neal Miller of the Trojan medical staff. The injury is thought to be a serious one and just how long Borah will be laid up is not known for several days.

There seems to be considerable discussion as to whether Henry Chaucer, the Sherman Indian distance runner, actually cracked the world's record for six miles Saturday. Chaucer was credited with doing the distance in 29m. 44s., thereby shattering Alf Shrubbs' mark of 29m. 52.2-s., made in 1904.

For Stanton, coach at Caltech, and Cliff Reynolds, L. A. High mentor, timed the race from the stands and reported that their watches showed 31m. 44s. The official timers of the race were George Adair, Sid Foster and Tommy Davis. Davis also had the job of keeping track of the laps. He reports that Chaucer ran the full twenty-four laps.

It's pretty hard to believe that Chaucer ran the distance in 29m. 44s., particularly when his record in the past is considered. Last year Chaucer was second in the same race here, being beaten out by Jenkins, another Indian, in 32m. 35.1-s. That's three minutes slower than the time credited to Chaucer Saturday.

QUITE IMPROBABLE. Boyd Comstock, former L.A.A.C. mentor, believes it quite improbable that Chaucer broke Shrubbs' record. "Shrubbs was coaching the cross-country team at Harvard in 1909," declared Comstock yesterday. "He was a great runner and I can't conceive of Chaucer bettering his record." Comstock coached Chaucer last year and the season before that and considers the Indian a fine marathon prospect but not a world beater over the six-mile route.

Willie Ritola holds the American record at 30m. 43.2-s. and Mr. Ritola, as the world knows, is quite some runner.

Bob Weaver, president of the

(Continued on Page 12, Column 4)

DE PAOLO IN HOOSIER RACE

INDIANAPOLIS, May 5. (P)—Peter de Paolo, twice American automobile racing champion, who retired a year ago, after a serious accident, has returned to the sport and will drive in the 500-mile race here May 30, it was announced today. De Paolo will be a member of a three-car team headed by Cliff Woodbury, of Chicago. He has been given the choice of the cars, two of which are front-wheel drives. The Italian-American was seriously hurt at the Indianapolis Motor Speedway last May, while preparing to qualify his entry for the race. Something went wrong with the steering apparatus, and the car hit a retaining wall and turned over. De Paolo won the American racing championship in 1925 and in 1927. He established a record of 101.13 miles an hour average for 500 miles here in 1925.

KETTLEMAN SOLUTION NEAR

Conservation Committee Expected to Report Findings to Umpire Van Deine Within Week

BY PORTER FLINT

The future of many drilling projects and others to follow is expected to be embraced in a plan to be submitted within a week to Umpire F. C. Van Deine, by the Kettleman Hills Conservation Committee.

Appointed nearly three weeks ago, the committee, headed by Judge E. D. Reiter, chairman, is reported to have reached a decision regarding the method to be adopted to lessen the number of drilling projects.

Members of the committee have been urged by operators to agree upon a curtailment program that will protect operators who already have permits to drill, and enable them to get time extensions if necessary for drilling wells on their respective leases.

Many of the permits that were issued by the state, and which are about to expire, and it is these permits which the operators wish to have extended so that their investments will not be lost.

While the Kettleman Hills Conservation Committee is expected to reach a decision this week, another committee appointed by Dr. George C. Smith, director of the United States Geological Survey, and representative of Secretary of the Interior Wilbur, will hold its first meeting early this week.

Dr. Smith, who has been nearly a week, having indefinitely canceled a number of engagements with governors of Western States in connection with discussions on oil conservation, appointed the committee for the sole purpose of seeing what can be done with the Kettleman Exploration Company's well, which is considered by the government to be out of control.

According to Dr. Smith, the Milham well, if allowed to produce in excess of 100 barrels a day, would not aid in lessening drilling projects. If the well is closed down successfully, he says, it will be a big step toward conservation, as it is reported to be blowing into the air every twenty-four hours 75,000 cubic feet of unused gas and 20,000 gallons of unrecycled gasoline.

Unless the drilling of the Milham well would improve the situation at Kettleman Hills, Dr. Smith repudiated emphatically that it would, adding that the well is the reason for the ever-increasing drilling projects.

As to the General Petroleum Corporation's well, about eight miles from Milham's well, Dr. Smith says it was entirely under control.

R. A. Sperry, vice-president of the General Petroleum Corporation, who was asked by Dr. Smith to serve as permanent chairman of the committee to study Milham's well and what methods to adopt to close it in, is reported to have suggested that a permanent chairman be selected from one of the committee's members.

MINE AGAIN OPERATING AFTER FIRE

Kennedy Gold Resumes Production Following Long Shutdown

SACRAMENTO, May 5. (Exclusive)—After an idleness of seven months caused by a fire last September which destroyed the mine plant, the Kennedy mine, near Jackson, has resumed production. A large tonnage of commercial ore is reported in sight, and the 100-ton stamp mill is scheduled to go into commission this week.

The Kennedy is one of the deepest gold mines in the world and is credited with a production of \$15,000,000.

Erection of the 100-ton furnace at the Cat Hill quicksilver mine of the Adams Mining and Milling Co. has begun, and the management expects to have production under way within a month. Large deposits of commercial cinnabar are said to be exposed. The company is producing about \$15,000 monthly from its La Joya mine, with net earnings said to approximate \$12,500. Los Angeles people are chiefly interested.

The California Copper Company has completed sinking of the shaft to the fourth level, and is preparing to drift for the extension of the ore body developed 240 feet on the thirteenth level. Diamond drillers from this level so far has failed to locate commercial ore in the north area. The company operates the Engels group in Pumas county. Although 1928 operations yielded \$1,717,652, the management reports a deficit of \$4,345 for the year.

MAMMOTH TO RESUME ACTIVITIES

Plans for Reopening of Mono County Property Reported Complete

Arrangements have been completed for a resumption of work in the development and operation of the property of the Mammoth Mines Corporation of this city, in the Mammoth Lakes district of Mono county, about fifty miles north of Bishop. Company holdings, according to M. D. Rooster, consulting engineer and mine manager, embrace several well-defined gold-bearing ledges. Conspicuous among these, he says, is No. 3 vein in which a shoot of free-milling gold ore has been stripped, on the surface, a distance of 600 feet, the deposit averaging about 118 per ton, with frequent occurrence of high-grade being encountered.

It is the intention, Rooster says, to extend the main cross-cut to an intersection with No. 1 and No. 2 veins, already developed to the extent that bodies of milling and high-grade ore have been uncovered and partially blocked out. Machine drills will be used in mine development, but it is the intention, eventually, to harness the waterfall and the main level of 4000 feet electrical power for the operation of machine drills and the milling plant in contemplation.

PLANS FOR BUCKSKIN MINE TOLD

President Reports Ore Shipments to Smelter Starting Shortly

Buckskin Consolidated Mining Company of Los Angeles, in the operation of its chief property, the Buckskin gold and copper mine in Douglas county, Nevada, states that work is to begin this week in the production of ore averaging about 118 per ton in its copper content, there being a goodly tonnage of this character of ore exposed in the mine workings. It is the intention of the company, President H. E. Woolrich states, to begin ore shipments within the next few days, or as soon as loading facilities are completed.

The new hoist, galleys frame and engine, Woolrich says, have been installed and housed, and L. E. Snider, M. D. Rooster, consulting engineer, at the mine, states it is the intention to proceed with the development of the gold-bearing ore of the property, of which a considerable tonnage has been placed in sight.

It is stated a deal is now pending, and will probably be consummated this week, whereby the Buckskin Consolidated will take over the property of the Sierra Vista Custom Milling Company in Mono county, this state, thirty-eight miles north of Bishop and four miles east from the station on the Owens Valley branch of the Southern Pacific Railroad.

NEW WELL ON WAY AT MARICOPA

North American Also Selects Location for Another in District

MARICOPA, May 5. (Exclusive)—In the Sunset field North American Oil Consolidated is starting its No. 1 well on Sec. 8, 11-22, and the location has been selected for the No. 2 on the same section. The former rig stands 974 feet north and 200 feet east from the south corner of the section, and the No. 2 is to be drilled 400 feet north of No. 1.

The Rigual Oil and Gas Company has spudded in its No. 3 well on Sec. 8, 11-22, 200 feet south and 200 feet east from the center of the southeast quarter of the section, and has already drilled to a depth of 600 feet. The rig is going up for the No. 4 well. The No. 1 well, brought in recently, is doing nearly 2000 barrels of 26.6 deg. gravity oil.

The California-Western Oil Company is rigging up rotary for its Haymarket No. 1 on Sec. 17, 11-22 on the Maricopa Flats, and the Union Oil Company is building rig for its No. 1 on the Fried lease, Sec. 8, 11-24.

PRODUCTION AT MINE TO START SOON

Regular Shipments by Wendon Copper Set for Early in June

Ned Creighton of Phoenix, president of the Wendon Copper Mining Company, with large mineral holdings in the Cunningham Pass section, Yuma county, Arizona, while in Los Angeles last week stated his company expects to begin regular ore production in June for direct consignment to smelters. It is planned he says, to ship the three months following initial shipments, to draw upon the reserves of high-grade exposed on the 1000-foot level of the Bardsoll shaft, for regular ore supply.

The installation of mining machinery incidental to the electrification of the mine plant, Creighton asserts, has progressed rapidly, and when the plant is in operation power will be available sufficient to handle 500 tons of ore daily. Initial ore production, he says, will be materially less than this maximum, but tonnage can and will be built up rapidly.

In speaking of plans being perfected for future local treatment of huge tonnages of mill ore of good commercial grade available in the mine workings, Creighton stated that steps are being taken to provide for the reduction of ore and shipment to smelters. The company concentrates obtained from the low-grade area of the mine; regular shipments of high-grade meanwhile being maintained. Following out this program the company expects to be on a profitable producing basis within the next few months.

OIL OFFICES LIKE EARLY HOURS IDEA

Companies Unanimously Observe Shorter Working Day for Summer Season

Summer closing hours in the offices of the oil companies in California, which went into effect the last week, were adopted 100 per cent, according to an announcement by the bureau of public information of the California Oil and Gas Association.

A day beginning at 8 a. m. and ending at 4:30 p. m. was the last, and, October 1, next, was advocated some weeks ago by the association, and oil companies had their office employees take a vote on the proposition. More than 90 per cent of the indoor workers expressed themselves as heartily in favor of the shorter working day in summer.

The particular aim of the association is to give office workers a little more latitude for recreation during the warm summer afternoons when work is a trifle slack because of the vacation weeks being observed by hundreds of thousands of persons in the business world.

Since the California Oil and Gas Association inaugurated this innovation, it is reported that other branches of industry in California are seriously considering the adoption of the same plan, as a group, in the expectation that it will result in a greater measure of health among office workers.

SEVEN NEW HOLES STARTED IN KERN

BAKERSFIELD, May 5. (Exclusive)—With 124 oil wells started in Kern county during the first four months of this year, development work has been going ahead briskly. During the past week seven new holes were started in Kern county and four water shut-offs were reported.

SHAFT TO HAVE HUGE HOIST

JEROME (Ariz.) May 5. (Exclusive)—The largest underground hoist ever installed in the United Verde Copper Company in its No. 5 shaft. Completion is to be within a year at \$350,000 cost. There must be excavation of 4000 cubic yards of rock and placing of 600 cubic yards of concrete. All equipment must be brought in through the 1000-foot level haulage tunnel and must fit within the tunnel's clearance of seven by nine feet. Operation will be wholly electrical, the hoist to be operated by a 2700-horsepower 550-volt motor with a flywheel set driven by a second motor of about the same size. Mechanical equipment will come from the Nordberg Manufacturing Company and the electrical installation will be of Westinghouse.

Heat losses in such an underground chamber will be high, so ventilation will be by blowing equipment to furnish 70,000 cubic feet of clean air a minute. The present glass-enclosed main-shaft equipment on the 500-foot level has been considered the best in place in the Southwest. The new installation will have capacity for 4500 tons a day from depth of even 5000 feet.

United Verde now has about fifty miles of underground workings, with addition of a great shovel-mined surface pit from which a material percentage of the smelter ores now is coming. No bottom yet has been found for the pay ore of the main lens, these generally in a primary chalcopryite of varying values.

It is asserted that the percentage of zinc is increasing with depth, a feature that is being given consideration in the company's laboratory at Clarkdale. Much of the United Verde's acreage still is unexplored, especially around a saddle, back of the old Glory Hole, into Walnut Gulch, above the Verde Central ground.

SEACLIFF PICK-UP LOOMING

General Petroleum Starts Work on Pier Preparatory to Drilling Projects in Ocean

Considerable activity at Seaciff is expected within the next few weeks as a result of the fact that the General Petroleum Corporation is starting work on its pier which is to extend out into the little bay a distance of about 1400 feet, and from which the company will build concrete and piling bulkheads upon which to erect derricks for the drilling of a row of deep wells in the ocean.

The company will drill its first well from this pier at about mean high-tide mark, and if it gets reasonably good results it will drill another well farther out in the surf. If geological conclusions hold good, and the dome of the Seaciff field appears to be some distance out in the ocean, the company will continue to work out, one location at a time, for perhaps 1400 feet, on its State tidal-land drilling permit.

FIGHT ENDS

The start of construction on the pier marks the end of a long contest between the General Petroleum Corporation and a number of other parties, including the A. L. Hobson estate (now the Hobson estate), the Richfield Oil Company and a Los Angeles syndicate.

The Hobson estate has leased to the Richfield Oil Company and successors to Henry & Hamilton a strip of land along the ocean front at Seaciff, just southeast of the causeway. The General Petroleum Corporation obtained from the State Surveyor-General a tidal-land drilling permit.

HOBSON CONTENTION

This permit the late A. L. Hobson contested on the ground that the littoral land owners had not been properly protected. There also was a dispute as to the mean high-tide line.

Both questions have been compromised out of court. The oil company has been allowed to drill the tide lands for a royalty to be paid both Hobson and the mean high-tide line has been compromised at a place which gives the Hobson estate room for an additional well.

BIG SILVER MINE MILL ON DOCKET

Plans for Construction of First Unit Reported as Being Complete

It is reported that arrangements have been completed for the construction of the first 250-ton section of the proposed 500-ton mill plant for the Big Silver Mines Company of this city, a subsidiary of the National Silver Corporation, the holding company.

In the treatment of its silver-gold ore the company will employ the amalgamation and oil-floatation methods of ore reduction. Orders for mill equipment will be placed with Los Angeles machinery houses this week, it is said, and it is proposed to have the plant installed and ready to go into regular commission, in ore treatment by October 1, next.

A letter from Supt. W. R. Johns, written from the company's property in Mono county, relates that the cross-cut being run from the footwall side of No. 1 vein, is now out a distance of twelve feet, an average sampling of the face returning silver-gold value totaling \$23.38 to the ton, comprising a first-class milling product. The management is anxious to recover the hanging-wall side of the forty-foot vein, known to carry an enriched strata, two feet in width and assaying up to \$126 per ton, according to numerous assays made of ore taken from the upper workings of the mine.

KERN RIVER FRONT MOST ACTIVE AREA

General Planning Start of Three New Projects at Early Date

OLDALE, May 5. (Exclusive)—The Kern River front continues to be one of the most active fields in Kern county with the General Petroleum Corporation carrying on an active campaign on the Young property. Grading is under way for the No. 32 well, the location being 1223 feet west and 760 feet north of the east quarter of Sec. 14, 28-27. Rig foundation is being laid for the No. 24 and a rotary rig is being moved in for the No. 35 on the same section.

Two drilling jobs on the West Kern front are making good progress. The Chandler-Candell "Kerry" Oil Company is down 3175 feet in its No. 24 well and the drill is going through tar sand. Casing was set at 1824 feet.

The Richfield Oil Company's No. 20 well on Sec. 22, 28-27 of the same field is progressing with the tools penetrating brown shale. The eight-inch casing was set at forty feet.

P. L. Mullen, president and general manager of the company, just stated that in following the vein on the 100-foot level of the property, the drift has been run a distance of about 150 feet from the mine, states that the width of the face; this ore averaging about \$50 per ton in its silver, gold and copper content.

Sometime this week, Mullen says, a cross-cut will be run in order to determine the full dimension of the ore body and its metal content, and it is also the intention, he states, to begin filling the ore bin above the mill crusher preliminary to making a trial run of the plant. It is planned to begin consignments of shipping ore to some smelter in the near future; and, during the present season it is anticipated that regular milling and shipments of mine ore will be maintained.

New Honolulu Oil Project at Round Mountain

ROUND MOUNTAIN, May 5. (Exclusive)—The Honolulu Consolidated Oil Company has spudded in its No. 1 well on Sec. 24, 28-29, with a portable drilling outfit and has already gone through surface formation more than 100 feet.

The Shell Oil Company is rigging up ready for its Caldwell No. 1 on Sec. 7, 28-29, at Round Mountain, is down 1726 feet in Freeman No. 4 on Sec. 20, 28-29, and is preparing to test after landing the pipe at the bottom of the hole. Rigging up operations for Jewett No. 6 on Sec. 29, 28-29, have been completed.

TUNGSTEN MINE AT YUCCA SOLD

Whittier Group Buys Eleven Claims in District

MILL TO BE MODERNIZED AND POWER INSTALLED

Machinery for Lead Mill at Chloride Arriving

KINGMAN (Ariz.) May 5. (Exclusive)—The Yucca Tungsten property of eleven claims, near Yucca, has been purchased from local owners by J. P. Stevens of Whittier, Cal. The material will be used in drill steel hardening, especially for oil well work.

A mill on the ground is to be modernized and a power plant is to be erected for lighting and machinery needs. A new tunnel is to be driven 300 feet below the old, bettering ore delivery to the mill. Its charge will be L. R. Rees.

Machinery for the new Monarch lead mill is arriving at Chloride and a new steel head frame is being erected on the main shaft. The ore will be from the old Tungsten and Schuyler properties, recently developed to the 1400-foot level, with declaration of the opening of large new bodies of high-grade lead-silver ore.

Offices have been leased in Chloride for the National Metals Company, with the local organization in charge of Col. Lewis Hine Ball, a Colorado engineer. The corporation controls a number of well-known mine groups, but is to start its work on the Rainbow and Semo properties, on which two long tunnels are to be driven and conserved.

The Navajo Consolidated Mines Company, already operating the bid Desert mine, has taken over the noted Colorado and Oro Plata properties. Development is to be under charge of Harry Newitt, mining engineer.

The Peach tunnel is to be driven to 3200-foot depth, 1000 feet under the Colorado croppings, this to drain the section. There already has been development of 1200 feet of 87 ore in this tunnel. The main veins are in situ. Paralleling is the Tub vein, with eleven feet of zinc and copper ore.

Work on Winze Being Pushed at Tom Reed Mine

OATMAN (Ariz.) May 5. (Exclusive)—The Tom Reed mine, now below the 900 level and is being driven rapidly, with the 1000 as an objective before further drifting. The vein is said to have narrowed, but to have shown betterment in grade of ore. Some trouble has been experienced in heavy seaming encountered within the vein, causing considerable expansion of a round of shot. The water situation appears to be well in hand.

Oatman Eastern's cross-cut now is in 600 feet, with cutting of a number of calcite seams that carry value. Since last October the company has done 3000 feet of work and has developed 400 feet of ore, said to be of good grade. William Terry, a miner of large local experience, is in charge of operations.

Oil Company Earnings

A new bulletin is ready covering 1927, 1928 and current First Quarter earnings of thirty of the petroleum companies whose securities are listed or traded in Los Angeles.

MAGMA COPPER CHANGING PLANT

New Electrical Equipment Being Installed

Extensive Ventilation Shaft Also Under Way

Option Sale Rumor of Dags Claims Current

SUPERIOR (Ariz.) May 5. (Exclusive)—The Magna Copper Company, W. E. Koerner, general manager, is adding extensively to its electrical equipment, with current furnished by the Salt River hydro-electric system, as well as from the smelter's reverberatory furnace waste heat.

Two Westinghouse 1500-kilowatt turbo-generators and one 3000-kilowatt will be installed. A new ventilation shaft is being started 4500 feet east of shaft No. 2, with upraises from the 100-foot level.

Last year's mill heads are reported to have averaged 6.52 per cent copper and the tailings 18 per cent, with average extraction of 86.52 per cent. The average 7.13 per cent copper, 3.43 ounces silver and .094 ounces gold.

The company has joined the Globe-Miami Mine Rescue and First Aid Association, directed by Orr Woodburn.

It is reported that the well-known Dags property, owned by the Consolidated Holding Company and including sixty-five claims, has been optioned by well-known mining capitalists. These claims once were under option to the Calumet and Arizona Company.

The Belmont Copper Company is to sell 300,000 shares of its treasury stock to finance further development work, to be extended on the 2000 level. Operations on the main shaft have been shifted to a winn from the 1800-foot level to avoid handling a heavy flow of water in the shaft. About 100 men are employed. The company has a mill operating intermittently. It is reported to have about 25,000 tons of lead-silver ore blocked out.

The case in the near-by Magna, there is expectation that lower workings will run into copper.

The Magna Apex Mining Company is starting exploration of fifty-four claims on ground adjoining the Magna. A 3000-foot shaft is to be sunk beside much drilling.

H. Anderson, a Tennessee banker, heads the company.

BELRIDGE ACTIVITY REPORTED

Summary of Operations in Field Given for Week at Various Projects

BELRIDGE, May 5. (Exclusive)—Activity in the Belridge field for the past few days is reported as follows:

The Belridge Oil Company No. 15, Sec. 26, 27-30, running tubing and swabbing. The hole is down 4200 feet and the casing is set at 4180 feet. The No. 30 on the same section is down 400 feet where the pipe is being landed preparatory to putting the well on the pump.

The Cymric Oil Company is side-tracking eight-and-one-quarter-inch casing at 1770 feet, with bottom of the hole at 1300 feet, and is cleaning out the well.

The Ohio Oil Company is drilling in shale at 2600 feet in its No. 25 well and the No. 24 is standing plugged at 700 feet. Both wells are on Sec. 30, 28-21.

PETROLEUM EXPORTS SOAR

Week's Shipments of 2,451,690 Barrels Almost Half-Million Above Previous Period

Leading the previous week's movement by more than 400,000 barrels, bulk petroleum exports from Los Angeles Harbor last week soared to the unusually high mark of 2,451,690 barrels, while gasoline shipments for the week scored a new high for recent months with a total of 1,146,346 barrels, fuel oil being in second place with 742,090 barrels, while crude oil dropped to a low of 291,247 barrels.

The Pacific domestic trade absorbed 1,045,061 barrels, including 226,268 barrels of crude, 478,280 barrels of fuel, 230,686 barrels of gasoline, 24,818 barrels of Diesel, 62,779 barrels of gas oil and 2523 barrels of kerosene.

The Pacific foreign trade took 718,605 barrels, embracing 265,790 barrels of fuel, 227,667 barrels of gasoline, 182,437 barrels of kerosene, 64,861 barrels of Diesel and 8000 barrels of Diesel.

The Atlantic foreign trade called for 235,815 barrels of gasoline, while the Atlantic domestic trade took 481,965 barrels of gasoline. The shipments for the week, taken by forty-two vessels, were as follows:

PACIFIC DOMESTIC
Lake Mifflin to San Francisco with 10,510 barrels of gasoline and 1025 barrels of fuel for Western Oil Company.

San Francisco to Portland with 75,427 barrels of gasoline for Associated Oil Company.

La Puente to Portland with 45,222 barrels of gasoline and fuel for Oil Company.

Orion to Wilmington with 78,343 barrels of gasoline for Standard Oil Company.

Cast. A. F. Lucas to Wilmington with 24,000 barrels of fuel for Standard Oil Company.

Seattle to Seattle with 74,225 barrels of fuel, gas oil, Diesel, gasoline and kerosene for Petroleum Corporation.

Bayne No. 2 to San Diego with 8078 barrels of gasoline for Standard Oil Company.

Group to Orem with 22,274 barrels of crude for Union Oil Company.

H. E. Murray to Richmond with 110,648 barrels of crude for Standard Oil Company.

La Brea to Portland with 72,877 barrels of fuel for Union Oil Company.

H. Bergman to Astoria with 24,897 barrels of fuel for Standard Oil Company.

RARE MINERALS, METALLURGY, CHEMISTRY

Qualitative analysis will be given to this department of the Times in correspondence with the following questions:

Volcanic Ash
LOS ANGELES, April 18.—Q: Please analyze contents labeled XXX.

Two Specimens
LOS ANGELES, April 18.—Q: Please tell me what samples 1 and 2 contain. No. 1 might carry Borax and -it comes from a borax country—near Daguerre. No. 2 was found near No. 1. I wish to thank you in advance.

A: No. 1 is barite (barium sulphate) and of good grade. No. 2 carries sparingly for copper (malachite and azurite) and for iron and manganese. Silver ores should be found at the locality.

Native Coppers
LOS ANGELES, April 19.—Q: The two very small samples here-with were handed to me by a friend, and he did not know the locality where from.

A: But one sample was received, and almost too small for tests. It is iron sulphate, slightly oxidized yellow on surface of crystals.

Three Specimens
ARROYO GRANDE, April 19.—Q: Will you please inform me through "In the Earth" column what the enclosed samples contain. All samples from the same ledge and carry several ounces of silver.

A: Sample No. 1 is altered and contains some lime carbonate, and in part conglomerate rock. No. 2 is also altered rock with garnetite present, and chalcedony (quartz) in the mass. The matter in small vial is amorphous iron forms from vugs, and consists of iron oxides, some garnet, and chalcedony.

Free Gold Assent
LOS ANGELES, April 20.—Q: Please analyze same for commercial values—especially for silver and gold.

A: Both samples react alike.

Some Minerals
LOS ANGELES, April 15.—Q: You will find enclosed a piece of rock I broke off a ledge in Mono county. Will you kindly test same for commercial values. I think.

A: The sample is rather small for satisfactory tests and is composed of crystallized varieties of hornblende and pyroxene with low percentages of brittle subvolcanic actinolite and a like variety of brittle tremolite. Cyanite traces. All of doubtful value but of interest as crystallized cabinet specimens.

Some Minerals
GANTILL, April 16.—Q: I am sending you by parcel post a sample of what we think is Borax. This is probably leaching out of a mountain in this vicinity, we found it on a mesa below the mountain.

A: The samples are composed of sulphates of iron, alumina, sodium, and magnesium.

Two Samples
KEENE, April 16.—Q: Under separate cover please find two samples of ore which I am unable to determine as to what minerals they carry and commercial values—if any. No. 1 I think may carry Wolframite and No. 2 may be chromite. There are large deposits of such minerals in this vicinity, and will appreciate your advice on this.

A: No. 1 is a mixture of iron silicates (rocks) siliceous iron and other hematite, limonite, titaniferous iron, some garnet, and low percentage of chromite. No. 2 does not react for Tungsten, it is amphibole (hornblende).

Two Specimens
ATOLIA, April 17.—Q: Enclosed find two samples found north of Rhyte Junction. Does No. 1 carry lead and zinc, and what is No. 2? There is a large body of each sample. Thanking you kindly for this service.

A: No. 1 was very hard to determine, and, in simple mineralogy it would be named barite. By chemical tests, however, we find lime carbonate present. Our search further was for Witherite, the valuable barium carbonate, which might occur at the locality. No. 2 is calcite with low percentages of strontianite and soda. Minerals

represented by the sample might be of use for paint mixtures.

Volcanic Ash
LOS ANGELES, April 18.—Q: Please analyze contents labeled XXX.

PROSPECT AT PLACER REPORTED

Boundary Cone Expects to Resume Operations Soon on Diggings

Boundary Cone Consolidated, Inc., developing the Blue Lead gold-producing ancient river channel near Mokelumne Hill in Calaveras county, expects to resume active work in its operation in the near future, according to the manager, who looks for encouraging results this summer from this portion of company holdings.

The organization, he says, has recently enlarged the scope of its operations by the acquisition of a group of mining claims on the north extension of the gold-bearing ledge recently brought into much prominence by the sensational gold disclosures made along its strike on the Bull Moose claim of the Gold Age Mines Company of this city. The Gold Age mine near Carrara, Nye county, Nev., has been in course of development and equipment for the past few years, and is now on a regular gold-productive basis, independent of the new strike on its property now creating so much interest in mining circles.

The Boundary Cone Consolidated group, it is asserted, is located about 600 feet from the boundary lines of the Gold Age company and, while virgin territory, surface indications, it is asserted, lead to the belief that it will prove to be gold-bearing upon a commercial scale.

Manager G. Raymond Boggs, president of the Gold Age company, before leaving by plane for the mine last week, telephoned that the wonderfully rich gold ore uncovered in company holdings is holding out most encouragingly with development, with every indication that the deposit will extend to much deeper levels.

PROJECT SPUDS IN

Standard Starts New Well on Midway Holding

FELLOWS, May 5. (Exclusive)—The Standard Oil Company has spudded in its No. 12 well on Sec. 5, 22-24, of the Midway field and the Shell Oil Company is coring and reaming in its Parris No. 1-A on Sec. 15, 22-23, of the same field at 4505 feet.

The Republic Petroleum Company is swabbing water from its No. 32 hole on Sec. 8, 22-23, at 4434 feet. The No. 34 is drilling ahead in sand and shale at 2060 feet.

L STATES SEEK TO CHECK WASTE

of President's Envoy Launches Move

and Oklahoma to Join California in Treaty

ference of Producers to Outline Method

reference between petroleum industry leaders of California, Oklahoma and Texas looking to a mutual compact for the conservation of oil resources and a check of the present wasteful flow is being negotiated by Mark L. Regua, California petroleum geologist, a paid general director of the oil division of the United States fuel administration during the war.

plan outlined yesterday by Regua who spent the day here in conference with George Otis Smith, director-general of the United States Geological Survey, in argument of the order of President Hoover stopping further lease permits to drill for oil on government land and is suggested by many of the Interior Wilbur as one of the conservation problems.

PRESIDENT'S ENVOY

in Washington to attend inauguration Mr. Regua was in conference with the secretary of the interior.

Mr. Regua said he had been through the department of the interior and completed a study of the oil reserves of the states in the west at delegates sent under his authority through unified efforts of the oil producing companies.

He discussed the matter with Secretary of the Interior Mr. Regua said yesterday, and men enthusiastic over the plan.

PLAN FINDS FAVOR

with the governors on "home" Mr. Regua said, explained the need of working national conference where they may be talked over and agreed upon the order of and the stabilization of the industry. The plan met with their approval and a compact between the producers in the three states with Federation is looked upon with favor.

Mr. Otis Smith has already indicated the situation to Cleveland on his return trip to Regua will confer with the governor of Oklahoma and Texas outlining the plans of Wilbur.

DIRECT OF STATESMAN

order of President Hoover order permits on government land for an investigation covering an investigation of the oil reserves of the states of petroleum production." Mr. Regua said.

Regua has been criticized as unjust and unnecessary. He said the facts, however, make it is nothing of the kind. To the contrary, it is an act of statesmanship.

There has been an endless waste of conservation," but a check of it is not out of place," Regua as he defined the term. "True conservation is not hoarding but wise utilization of resources, and it involves preserving in unimpaired efficiency but also wise use of equitable distribution; bringing about social justice to the greatest good to the number—and that for the time."

WILBUR FOR GRANTED

knows that gasoline article of first importance in the daily life of the people. However, consider the many activities involved in its production and consumption. It has always been a commodity that will continue to grow.

Torso Murder Clews Sought in Suspect's Trunk Lid Stains

ABBOTT DENIES KNOWING VICTIM

Reference to Quickmads Not Remembered

Police Think He's Shielding Woman's Name

Talk With Fellow-Workmen About Wife Explained

Stains on the under side of a trunk lid belonging to Leland West, a Los Angeles River bridge worker, held for investigation in the mystery of the Los Angeles River torso murder, are to be examined by evidence of human blood by county chemists this morning. The trunk was found in Camp Chileno, at government forestry station thirty-three miles in the mountains back of Mt. Wilson, when Abbott was taken into custody by Deputy Sheriff Modie and Detective Lieutenant Allen Saturday.

Abbott, 33 years of age, steadfastly denied any knowledge of the torso murder or the identity of the victim yesterday, although he admitted telling fellow-workmen in a Los Angeles warehouse that "I have a wife in Lynwood whom I intend to finish."

He explained to the deputy sheriffs that he told the warehouse of his wife's name to his fellow-workmen because he had been giving him trouble so that he would have a good excuse to leave his job and then come back to it again when construction work in the government forestry service ended next winter.

He asserted he does not remember having mentioned the "quickmads" in the Los Angeles River as a means of hiding evidence of a crime. He also tangled his story when he first told the sheriffs about trouble his sister had with her husband, and a half-hour later he denied having a sister. Detectives are inclined to believe Abbott is attempting to conceal his association with a woman whose identity they have been unable to discover.

They did learn that Abbott had

GANG KILLING DEFENSE DUE

The defense is scheduled to get under way today in Judge Wilson's court in the trial of Mike Pupillo, Domenic De Chila and Vito Ardi, alleged gangsters charged with the murder last July of August Palombo, alleged hoodlumper, who was slain while parking his automobile in the 2200 block on Hillcrest avenue. Dep. Dist. Atty. Menzies and Clarke announced Friday they will rest their case with the closing of the testimony today of Palombo's widow. It is the contention of the state that the defendants fired on Palombo from an armored automobile to remove him as a competitive factor in bootlegging business in Los Angeles.

With the closing of the state's case, it is expected an effort will be made to establish an alibi for the defendants through testimony to be offered by William T. Kendrick, Jr., defense attorney.

Each blade which Abbott owned, however, has not been located. Abbott told the officers he left the knife in a small trunk in storage at 542 Gladys avenue, Los Angeles. Yesterday they found the small trunk and a suit case at that address. The trunk did contain two shot guns, half a dozen pocket knives and four pistol holsters.

The automatic pistol, sought by the officers, was located in a pawnshop on Fifth street. Abbott asserted he never carried the pistol except on business trips and explained he pawned it before going to the government camp to obtain enough money to carry him until pay day. He asserted he returned to Los Angeles a week ago and repaid the pawnbroker half of the amount he had obtained on account and intended to redeem the gun next week.

Although Abbott's story could not be shaken yesterday the officers are working on the theory that there another woman in the case, who will have to be accounted for.

FORMER BANK TELLER TO ENTER PLEA TODAY

Accused of misappropriating \$285 of bank funds, Paul D. Sedgers, formerly a collection teller of the Bank of Italy branch at Alhambra, is scheduled to appear today before United States District Judge McCormick for entry of plea. Sedgers appeared in court last week and his bail was reduced from \$5000 to \$2500, which he furnished and was released. It was stated to the court that the teller's father made restitution to the bank.

Police Stirred by Bonelli's Political Attack

BONELLI FOR MAYOR COMMITTEE

346 ROWAN BUILDING

PAGE 1361

DEAR OFFICER:

In view of the definite stand I have taken against certain members of the present Police Commission and Police Chief James E. Davis, and the subsequent purposeful misrepresentation of my stand both by Chief Davis, members of the Police Commission and some of my opponents in the present campaign, I am taking this opportunity of informing the members of the police force of my attitude toward them.

Both in writing and in speaking, I have consistently said that in my opinion, the great majority of the rank and file of the police department is honest, courteous, courageous and worthy of the whole hearted support of our entire citizenry, but that the present disorganized morale, the lack of harmony and co-operation and the consequent ill repute of the police administration, is the result of the failure on the part of the Police Commission and the Police Chief to back up these officers in the proper performance of their duty.

I do not believe in continued official whitewashings of the misconduct of a selected clique; in constant shifting of respectable and qualified police officers to the sticks as a penalty for having done their duty; or of the policy of delegating despotic power to one individual to hear and decide complaints registered against police officers; or of improper distribution of equipment and personnel between divisions so that responsibilities are much heavier on some than on others, and certainly I do not believe in members of the department being subjected to the orders of characters of the "underworld."

I do believe that you are entitled to have a chief not only honest, sincere and courageous, but in addition to these, a man of sufficient executive ability to properly handle the enormous problems of law enforcement in this city, and one who at all times has a close human regard for the welfare of every man in his department. I believe the trial board should consist of at least three members upon which the rank and file of the department have representation.

In conclusion, I say to you that I will continue to follow these same policies which I have repeatedly stood for during my term of official duty as president of the Los Angeles City Council. If elected Mayor you may rest assured of my continued support of the Police and Fire Pension System, and of my willingness to discuss your problems with you, render every reasonable assistance to the men of the department, so that through a respected and respectable administration with adequate equipment and a contented personnel, we may together win back for our law enforcement agencies that wholesome respect of our citizenry to which we are entitled.

Sincerely yours,
John J. Bonelli
President City Council

P. S.—My opponents say they will do this and that, but if you inspect my record in the Council you will see that I have already done and will do what they are only vaguely promising to do.

PRIMARY ELECTION MAY 7TH

"bitch" to all the members of the police department.

We've been getting our heads well above the stormy political seas. Why shove us back in?

Respectfully yours,
[Signed]

W. B. SHOEMAKER, sergeant of police, Los Angeles Police Department.

WOMEN SEEKING LAURELS IN SKY

(Continued from First Page)

arrangements for planes to use in the flight.

Four of the local flyers own and pilot their own planes. These owners are Miss Trout, Mrs. Florence Love Barnes, San Marino society aviatrix; Miss Josephine Callaghan, armless sportswoman, noted for her ability to ride horseback, drive her automobile and pilot a plane despite her handicap; Mrs. T. J. Kelly, owner and operator of the Kelly Airport in Hawthorne.

Age seems to make no difference in the ability of the women flyers to pilot their planes, as the results of the survey show that Miss Marion Newbert, of 917 Canyon Drive, is only 18 years of age, while several of the aviatrixes are more than 30, and Mrs. Kelly is 40. The chief pilot at her airport is her son, who is 21.

The average age of all the women flyers, however, is 24. A few have been flying for more than a year, but most of them have learned within the last few months.

Three motion-picture actresses are listed among the Los Angeles feminine pilots.

OIL STATES SEEK TO CHECK WASTE

(Continued from First Page)

to be has been taken as a matter of course by the public.

"There is no known method whereby our reserves of petroleum can be accurately determined. We know that up to date the total production has been 11,242,000,000 barrels and we are sure there is a large reserve still to draw upon. If we assume this reserve equivalent to past production we have about ten years' resources, without any allowance for increased consumption; and if we assume that there is double the quantity yet to be produced and still without allowance for increased consumption, we can go on for about twenty years.

"Today California, Oklahoma and Texas are producing more than 85 per cent of domestic consumption. In 1900 New York, Ohio, Pennsylvania and West Virginia were the four most important sources of supply with a total of over 84,000,000 barrels or 85 per cent of the nation's output.

"Petroleum companies occupy an important position in the life of the nation, but in the past there have been no 'rules of the game'—no standards, no code of ethics. It has been a case of acute individualism with every one doing about as he pleased or was financially able to do, with no regard for co-operation. The picture is one of frenzied effort to produce and sell irrespective of the requirements of the market."

Mr. Reagan, who is nationally known as one of the original "Hoover-for-President" leaders, will go to his home in Santa Barbara today for a short rest.

NEW CHURCH FORMED

The group of Christian Scientists who have been conducting Christian Science services at 2455 Eagle Rock Boulevard, near Fletcher Drive, have applied for and received recognition as a branch of the Mother Church, the First Church of Christ, Scientist, in Boston, Mass., with the title of Twenty-ninth Church of Christ, Scientist, Los Angeles, Cal.

BUDGET ITEMS FACE SLASHING

Cryer and Knox Try to Cut Excess Demands

Total of \$35,504,606 Asked for Departments

Municipality Expects to Get Only \$25,660,000

The estimated income of the city for the next fiscal year, as presented by Mayor Cryer and Director Knox in the Budget and Estimates report, has been set at \$25,660,000. The figures are \$9,844,000 less than the requests, which have been submitted by the various city departments. The requests total \$35,504,606.

A similar dilemma confronted the city last year when they were working on the budget for the fiscal year. The requests of the departments at that time totaled \$34,000,000 and the estimated income of the city was \$23,000,000. The city was forced to slash \$11,000,000 from the departmental demands.

"Mother's Day, to be celebrated next Sunday, is a consideration of the office of mothers in human society," said Rev. W. L. Lay at the Union Church.

"Mr. Isett spoke in part as follows:—He stressed me that both mothers and fathers ought to consider the value which they possess, even if it estimate it in money. If we do turn it around and esti-

the worth of mothers we have
to consider the projection of
influence of motherhood into
the Lindbergh, Henry Ford
Thomas A. Edison. Should we
rate the time of mothers at a
monetary value, say of 50 cents
an hour, there are millionaire moth-
ers all around us. Maybe they
became there is not money
to bank they are poor. But

is eternally safe and increasing in value. Jesus meant more than a sentiment when He said: "I would like to stimulate you, yes, and fathers, too, to their actual wealth in their souls." And! Some of this great wealth has been scattered and wasted in the human bank broken by sin and wickedness. A criminal wastes not only his own wealth,

RADIO TO AID
"MUSIC WEEK"American Composers Will be
Featured on AirJohn Philip Sousa's Series
Scheduled Over KFIKFWB Planning to Present
Ted Lewis and BandBY DR. RALPH L. POWER
Music week was ushered in yesterday everywhere, and broadcasters are going to strain every nerve to keep programs this week up to a high standard of excellence.

While classes of all nations will be featured, particular emphasis probably will be given to the works of American composers. The week-long campaign of the National Music Week Committee, will be carried to full fruition through the efforts of the press, schools and radio.

It is rather significant that John Philip Sousa has picked today as the date for one of his infrequent radio visits.

NEW RADIO SERIES
He will conduct an hour program from New York, commencing at 5:30 p.m. Pacific time, and will be heard locally via KFI.

Although Sousa plays before huge audiences, appearing once before an audience of some 150,000 people at the International Exposition in Grosse Pointe, the grand old march king tonight probably will have one of the largest audiences in his entire career.

It is said that he will play a series of eight Monday night concerts.

SAN JOSE BAND
KQW, San Jose, will start music week with the San Jose Municipal Band, from 7:30 to 9 o'clock tonight.

Eight o'clock will mean an hour of classics for KNX with the Madrigal Ensemble, sixteen singers, under the leadership of Frederick Vance Evans, Claire Melonno, concert pianist, will be an assisting artist while Bianca Sherwood will act as accompanist.

This Monday evening series has been an especially fine broadcast. The present series comes to an end tonight, but undoubtedly will be continued within a few months.

GOVERNOR TO SPEAK
The Columbia chain will again reverse the order of things and at 5:30 p.m. will send a network feature eastward instead of originating in New York.

KFWB will be the host and plans to present Ted Lewis and his well-known band; Vivienne Segal, musical comedy performer, and Dolores Costello from filmland.

KMTZ-KPLA wavelength will be busy at 8:15 with another theater premiere, and at 9 o'clock, Gov. Young is scheduled to speak from Sacramento and thus open the Avocado Show in Whittier. Part of the musical portion of the program is to be given by the Boys Band of Sacramento.

TWO-HOUR JAMBOREE
Among the KJLH programs, the Don Lee station will have a half-hour continuity by Van C. Newkirk at 7:30 titled, "A Program Without a Name." Then the KJLH Blue Monday jambores will hold

night, on 296.9 meters, under the direction of Bandmaster William Lake.

Eight o'clock will mean an hour of classics for KNX with the Madrigal Ensemble, sixteen singers, under the leadership of Frederick Vance Evans, Claire Melonno, concert pianist, will be an assisting artist while Bianca Sherwood will act as accompanist.

TODAY ON BONDSOrdering Issue on June 4
Ballot ScheduledSum of \$40,000,000 Sought
for Water and PowerPurpose of Fund Explained
by Van Norman

Following his unanimous adoption of resolutions favoring submission of water and power bonds aggregating \$40,000,000, the City Council is scheduled today to take final legal steps necessary to place the bond issues on the June 4 ballot.

H. A. Van Norman, general manager of the Department of Water and Power, in supporting the bond proposal of his department, explained that "it will enable the water and electric systems of Los Angeles to keep pace with the population and industrial expansions."

The city's municipal water and electric systems at the present time amount to approximately \$200,000,000, and the gross revenues now amount to more than \$25,000,000, he said, in announcing the interest and principal charges on the proposed bond issue will be paid from the revenues of the department.

PURPOSE OF ISSUE
The department proposes a \$50,000,000 improvement program. Van Norman said, \$10,000,000 of which will be provided from the earnings of the department, and \$40,000,000 from the proposed water and power bonds.

The purpose of the issue is to provide water and power facilities for a growing Los Angeles, pending the development and bringing in of Colorado River resources, the general manager said, in predicting that it will be eight to ten years before the water and power resources are available.

Among the major projects which will be constructed under the three-year program for which the water and power bonds will be provided are:

MAJOR PROJECTS
Purchase of water lands and water rights in Owens River Valley not already owned by the city and increasing thereby the aqueduct water supply approximately 25 per cent.

Enlargement of Los Angeles Aqueduct 20 to 25 miles to increase its capacity approximately 25 per cent. Construction of additional reservoir storage capacity near Los Angeles sufficient to store 12,000,000 gallons of water for immediate use.

Installation of 150 miles of thirty-six and twenty-four-inch water trunk lines to deliver large quantities of water to widely separated sections of the city.

Erection of two new hydroelectric generating plants in the Owens Valley, the first of which will operate these plants will be made available by the proposed land purchases.

Construction of 200 miles of high-voltage transmission power lines to bring Owens River generated electricity to Los Angeles.

Installation of 1100 miles of power and light distributing lines and underground cables.

Erection of six new electric distributing stations.

Fully 7,000,000 pairs of wooden shoes were sold in Holland last year.

SOUTHLAND
DENTISTS TO
MEET TODAYAnnual Convention of
Profession Will Gather at
Biltmore

One thousand dentists will attend the annual meeting of the Southern California Dental Association, which opens this morning at the Biltmore. The meeting will be called to order by Dr. Charles C. Noble of Los Angeles, president of the association, at 9 o'clock. A full program of clinical talks will be given at sessions today and tomorrow.

Preventive dentistry and other subjects with a social aspect, including plans for a national "Save the Teeth" advertising campaign, will be presented at the meeting.

Prominent speakers on the program include Dr. George S. Monson of St. Paul and Dr. Willis A. Coston of Kansas City. Dr. Monson will read a paper at this afternoon's session, while Dr. Coston will speak on tomorrow morning's program.

The annual banquet and entertainment of the association will be held at the Elks Club tonight under the chairmanship of Dr. E. Leslie Eames.

GRAYSON
WELCOME
ARRANGEDSpanish War Veterans'
Commander to be Feted
Here on 14th Inst.

Arrangements for the visit of William L. Grayson, commander-in-chief of the United Spanish War Veterans, to Los Angeles on the 14th inst., have been completed, according to F. S. Lawrence, commander of Glendale Camp, No. 97, chairman of the committee.

A reception will be held at Central Station at 8:15 a.m., when Grayson is slated to arrive. He will go immediately to the Biltmore. At 1 p.m., he is to address a meeting at the Soldiers' Home at Sawtelle, and at 8:30 p.m., will be guest of honor at a banquet at the Alexandria.

Commander Grayson also will speak at a public meeting at Pacific Hall, 1816 South Figueroa street, at 8 p.m. Judge Guerrero is to be master of ceremonies at the meeting. Grayson will spend the next day in visiting points of interest in the city and vicinity and will leave for Arizona at 2 p.m. on the 15th inst.

STUNT FLYERS FACE GRIEF

Acrobatic Plane Pilots Must Obtain Permits from
Sheriff Before Doing Tricks in Sky

Acrobatic flying or aerial stunting of any nature is restricted to aviators who first have procured permits from the Sheriff to engage in such hazards, according to County Counsel Mattson's interpretation of an ordinance adopted last October by the Board of Supervisors.

The opinion is contained in a report made by the County Counsel on file with the board. According to Mattson, the ordinance regulates the operation of airplanes, dropping from parachutes and "acrobatics," and requires a permit from the Sheriff on the part of any aviator who wishes legally to indulge in any type of flying not regarded as ordinary.

It is regarded at the Courthouse that Mattson's opinion presages the beginning of a campaign on the part of county authorities to stamp out asserted reckless flying.

A number of recent fatal accidents are said to have forced on the county enforcement departments the necessity of impressing aviators with their growing responsibility of safeguarding the lives of passengers and residents of the community.

The ordinance requires that any aviator who wishes to engage in such hazards, according to County Counsel Mattson's interpretation of an ordinance adopted last October by the Board of Supervisors.

MR. HORTON IN PLAY BY BOUCICAULT

Pleasant Entertainment for
Refined People is Offered
by Actors at Majestic

BY EDWIN SCHALLERT
Mr. Dion Boucicault's "The Streets of New York" was presented last night at the Majestic Theater by Mr. Edward Everett Horton and an efficient company. This is a very fine play, with settings and costumes in keeping. The plot is a masterpiece of modern drama. The first act occurs during the commercial panic of 1837, and the remainder of the drama during the panic of 1893. The musical score, including "Alice Ben Bolt," "Hearts and Flowers," "The Angel's Serenade" and "Sweet Genevieve" are rendered by a large and competent orchestra and a singer. The audience was enthusiastic and cheered Mr. Horton. They applauded Miss Edith Bennett, who with charming grace, appeared as the sad heroine. They hissed the perfidious banker and thief so well executed by Mr. Mitchell Harris. Another actor whose talents received recognition was Mr. Tully Marshall. He is new to the stage here, but it may be guessed after the applause he received that he will be seen often. Mr. John Little, Miss Helene Millard, Mr. Fred Cummings and Mr. Pat Kelly are among others who shared in the evening's appreciation. Mr. Boucicault's play is indubitably well written, and though the plot is not new, it is embellished with stirring dialogue and vigorous situations. Without peradventure of a doubt, that scene which sees Miss Lucy and her mother slowly succumbing to the fumes of charcoal will cause the young ladies of the audience to resort to their handkerchiefs, while the men will be deeply impressed with the heroism of Mr. Mark Livingston as bravely incarnated by Mr. Horton, who appears always an actor conscious of his deep obligation to his public. He and Mr. Marshall, as well as Miss Bennett, and the others did everything to make the evening enjoyable as did Miss Florence Roberts, Mr. Harrison King, Mr. Hilling, who sang between the acts, the young ladies in the fashion parade, the gentlemen responsible for a few spectacular fire scenes, and a few others whom we are unable at the moment to mention. It may be assured that this entire entertainment is of a sort to appeal to ladies and gentlemen of refinement who discover their pleasure in visiting our theaters. It will be best, though, if they go well provided with pocket handkerchiefs to enjoy both the tears (maybe those of laughter) which this drama written in this pleasant period of the fifties induces. Carriages may be ordered to call at 11, or those who prefer to walk home these mild spring evenings may do so.

Cinderella Tale Brought to Date

The "physical beauty" of Mary Pickford has been found right in Hollywood. The star of "Coquette" (which is now at the United Artists Theater) offered to give the dress she wore in "Coquette" to the girl who fitted into it best. With the star of the theater, Miss Pickford made this offer known to the young women of Southern California. Three thousand of them answered, believing that they could fit into Mary Pickford's dress. It was not her shoes.

Of the 3000, Frances Ryan, Hollywood girl, came closest to Miss Pickford's own measurements. The dress was given to her at the theater Friday by John St. Polis, who appears as Miss Pickford's father in the talking film.

Belasco Brings Creator West

Ruth Lyons, the original Buddy Miles in the New York play, "Night Hostess," who has been imported from New York by Belasco and Curran to play the same role when the speaking play opens Saturday night at the Belasco, was last seen in Los Angeles several years ago as leading woman for William Hodge.

From a sedate career with that star she was selected by John Gold as the ideal person to portray the innocent little cabaret singer, when he first presented "Night Hostess" early last season.

The local producers secured "Night Hostess" for Belasco showing at the height of its eastern run, but were forced to postpone its presentation here owing to the untimely death of Miss Lyons at an earlier date.

University to Send Jazz Band

U.S.C. Night will be celebrated at the Fox Boulevard Theater tomorrow, with Harold Grayson's southern California Syncopators offering special numbers on the stage.

The affair has been arranged in connection with showings of "Syncope," R.K.O.'s talking jazz drama, which is playing at capacity houses at the Vermont and Washington boulevards.

WESTLAKE'S BIG EVENT
Montana Night is to be observed at the Westlake Theater tonight in honor of Gary Cooper, a former Montanan. Cooper, who is seen on the Westlake screen for the next four days, with Lupe Velez in "Wolf Song," will make a personal appearance on the stage with Miss Velez, and will also be in a special stage act with several Hawaiians, the management announced.

Night will be the biggest event to be staged at the Westlake this season.

"ANNIE" LINGERS ON

Rowland and Pearce, producers of "Little Orchid Annie," at the Mayan Theater, have made eleven-hour arrangements for four more performances beginning tonight.

"Show Boat" Makes Port

Laura La Plante and Joseph Schildkraut
Portray, respectively, Magnolia and Gaylord Ravenal in the sound-film coming this evening to the Biltmore Theater. The picture, a Universal, was adapted from the book by Edna Ferber and the Ziegfeld stage spectacle.

FILM REJOICES IN COLLEGE WHOOPEE

"Hot Stuff," a talkie with Alice White, screened for Biltmoreaters.

Alice White romps back to the good old college campus for her first talkie, "Hot Stuff."

Only instead of acquiring a degree, she picks a fraternity pin from the main chest of William Bakewell. Under the rough "key-hole" exterior, she's a sweet, demure, bashful little girl. Luckily, William Bakewell finds it out in time. He's the same way. And so they live happily ever after.

"Hot Stuff," which arrived at the Biltmore yesterday, isn't as bad as it sounds. It is a smartly filmed, never overly sentimental, and effective comedy. As the supposedly "burnt-out" girl, Alice is entirely convincing while William Bakewell gives a sincerely appropriate characterization of the boy. Louise Fazenda has some good moments. There is an excellent idea behind the story by Robert S. Carr. At the end, it has, as usual, been all dressed up with the conventional in the movie-catalogue "ga-ga" trimmings. Mervyn Le Roy directed.

Riffs to Fold Tents Shortly

The Riffs are preparing to leave the screen of Warner Brothers Theater, where they have been appearing in "The Desert Rose" for some weeks. The last performance of the Vitaphone opera is set for the 13th inst.

The next attraction will be an all-talking version of the stage play, "The Time, the Place and the Girl," which will begin a one-week run on the 13th inst. This is also a Vitaphone production, adapted for the screen by Robert Lord from the story of Frank R. Adams and Will Hough.

Since the stock market speculation fever has swept the country, women have taken the places of some of the biggest manipulators in Wall street, it is said.

What can happen to women who have their investments on a salesman's personality rather than the soundness of a security is shown comically in "The Time, the Place and the Girl."

Lincoln Stages Musical Comedy

Having the distinction of being the only musical comedy in town, "Not Tonight, Dearie" will be uncurtailed at the Lincoln Theater tonight. The show, which is to appear in the leading roles, marking this troupe's fourth musical production on the Lincoln stage.

"Not Tonight, Dearie" will boast an army of talent, for Robert Levy, the Lafayette troupe's manager, has engaged Little Charlie Witt, the miniature Bill Robinson, for some whirlwind dancing; Mary Richards, versatile dancer, and French and French, who give exhibitions of Russian, tap and acrobatic numbers. Paul Howard's Quality Serenaders will be in the orchestra pit.

Attendance at Chinese Large

Registering another mile post in its record-breaking run, the 400,000 mark in attendance will be reached at tomorrow night's presentation of "The Broadway Melody" in Grauman's Chinese Theater.

TWO IN PERSON AT STATE
Tonight's screenings of "The Bridge of San Luis Rey," at Loew's State, will be marked by the appearance in person before the footlights of two of its stars, Raquel Torres and Don Alvarado.

DUNCANS IN RETURN TO VARIETIES

Popular Sisters Headline
at Orpheum; Bobby May,
Walter Long and Others

BY PHILIP K. SCHUCK
A fairish bill of varieties, its second half considerably better than its first, succeeded in regaling a majority of the amusement seekers at the Orpheum Theater yesterday afternoon. In the tally of triumphs, more momentary than enduring, it is certain that the Duncan Sisters emerge as the top, with a juggling and balancing act called Bobby May—"All Alone"—so good that it must be seen to be believed, coming next.

Gazing upon the renowned Miss Duncan, a prima donna that long has been denied me. It was not, indeed, until they moved into the spotlight at this same Orpheum Theater on this same afternoon that I clapped startled eyes on them for the very first time. I saw two well-grown women in the lace and hair ribbons of little baby-tail and both of them giggle incessantly. The audience saw and heard them also, and, completely captivated, clapped for more and more.

Much amusing material has been supplied the Misses Duncan. The familiar "Strange Interlude" form of speaking the words aloud is made into a minor tragedy of the home, with one Miss Duncan playing the wife and the other playing the husband. The same ladies impersonate two of a quartet singing a favorite "Rigoletto" number, a couple of quiet dumplings of the store-window type substituting uncomplainingly for the absent duo—"Topsy and Eva," the musical piece which Los Angeles and other cities found so refreshing, is rehabilitated for a space, with the popular "Remember" to climax it. At the curtain yesterday there were social tributes.

A well-written melodrama, recently performed at the Writers' Club in Hollywood, was presented with Walter Long, the film villain, as its particular star. Briefly, it is the story of a man who is called out to "Ace" Jacobs, a Chicago gunman, who had sworn that when his time came, he would "pass out" with both eyes open, and all gangland for his courage afterward. There was irony in the development of this vanity of his, which did, indeed, end in the spectacular, but not precisely in the manner he had expected.

Long seemed unsure of himself and his lines. Victoria Cleary and Frederic Howard appeared in the sketch with him. The author is H. H. Stinson.

Two other acts tell woefully short, I thought, of the mark for which they were aimed—laughter. Carl Freed, dubbing himself "U. Rept's Foremost Musical Director" (a far reaching appellation to start with), offered a company of jammies musicians which performed the rather amusing feat of beating out the stage for fifteen or more minutes continuously without getting through a single recognizable melody. Whenever these instruments of their two-four time was actually going to turn into something a little more satisfying than just two-four time, they were deftly forestalled by their leader, the aforementioned Mr. Freed. Nothing short of matching up every instrument of himself contented this maestro, who enjoyed himself something terrible.

Bob Nelson was a wise-cracker who, when the spirit moved him, sang. One imperishable gem, a sentimental ballad, "Love the Little of Me," he sang. "Love the Little of Me"—there is or not—"Wandering Boy," "Wander On," "Wandering Boy." Those of us who burst into belated laughter when he first announced it, thinking, "Ah, what a fellow!" as we did so, soon found that Mr. Nelson was never more serious in his life; and our embarrassment, you may be sure, knew no bounds.

Flourieffe Joffrey, a coloratura soprano, revealed the possession of a voice of clarity in a rather girlish way; and the Patsy Brothers demonstrated a patently daily done would never make us as they are.

"Dybbuk" Will Open Friday

Rehearsals of "The Dybbuk," the internationally famous mystic drama, which is to be given in English at the Waxman Theater, with a cast of stage and screen favorites, have reached such a promising stage that Morris Waxman, the producer and director, has set Friday evening for the complete cast.

The complete cast is as follows: J. Barney Sherry, Gertrude Short, Morley Waxman, Edwin August, Barbara Bedford, Kate Kane, Ben Crane, and Brown Fair, Iva Sheppard, Irving White, Frank Bonner, Oliver Eckhardt, William Nolte, Edward Peil, Jr., Russell Seeger, Lloyd Taylor, Cecile Arnold, Alma Chester.

Hollywood Sees O'Neill Drama

Eugene O'Neill's nine-act drama, "Strange Interlude," opens today at the Hollywood Music Box.

Although this play has already had a premiere in Los Angeles and a long run at the Biltmore Theater, the opening performance for the Hollywood engagement is reported sold out.

For the rest of the week the demand for seats has been so great that O. D. Woodford, in telegraphic conference with the manager of the Theater Guild production, has decided to extend the engagement for a second and last week.

IT WASN'T FRANK CRAVEN
In an interview with Harry Pollard, the director of "Show Boat," which appeared in yesterday's edition of The Times, it was stated erroneously that he was a protégé of Frank Craven at the Caesar Theater in San Francisco. Mr. Pollard was befriended and advised on his career by the late Frank Craven. Mr. Craven is very much alive, and following the close of his recent play, "The Nineteenth Hole," he is now in Hollywood.

DYAS
"Two Stores to Serve You"

Child Health Week
the nation dedicates to its future citizens this week—May 6th to 11th

In the morning
It's surprising how many things from DYAS Baby Shops are needed to keep the "wee one" healthy, comfortable and happy. Begin with the morning bath:

- Enameled bathinets (tub and table combined) 12.50
- Dr. Johnson's preparations, powder, soap, etc. 1.00
- Enameled bath thermometers, ivory, pink, blue 85c & 1.00

Then for the play hour and sun bath:
Sun suits of washable cotton, 1.00, 1.95
Play yards—wood floor, 7.95 to 10.00

Time for lunch? Baby needs:
High chairs in colors (porcelain top) 8.75
Earthenware feeding set (in yellow) 1.75
Feeding bottles 2.95 to 3.95
Feeding bibs, white or colored terry, priced 25c to 1.00

In the afternoon, "nap time":
Cotton coverlets, pink, blue, 1.00 to 1.95
"Snookums" sleepers of birdseye 1.30
Screened Kiddy Koops, enameled 35.00

Baby is dressed for the promenade:
Little silk or cloth coats 7.95 to 16.50
Baby's bonnets or pique hats 1.00 to 3.95
Reversible-gear baby carriages 36.00

And, last of all—bedtime:
Enameled cribs, pink, blue, green 18.75
Mattress 3.75
Pink or blue "Baby Pepperell" sheets and cases (2 cases, 2 sheets boxed) 3.95
Kenwood blankets 6.95 to 8.50

Promenade
Mrs. Chester C. Ashley, president of the Young Women's Christian Association, is president of the Ebell Club, and member of many civic and philanthropic societies, including John S. Myers for re-election to the office of City Controller.

Bed time
Following a careful check of the Seventh District, Howard W. Baker, campaign manager, Dwight Baker, re-elected, announced that the Councilman's candidacy for re-election is favored by 70 per cent of the voters. "Unusual interest in the election is being displayed by voters in all sections of the district," Baker declared. "I believe that the largest vote ever cast in the district will be recorded Tuesday."
